

"A whole lot more than just new Factors"

Presented by Ken Surface
Summer Conference 2007

### Course Outline

- · This course will cover:
  - Discussion regarding the work that is needed to trend problematic residential neighborhoods.
  - How to fix these problematic neighborhoods by addressing effective years, conditions, grades and land values for all the properties within the neighborhood as they relate to 2006 market values
  - How to accomplish our goal of reducing appeals and decreasing tax rates

### Course Outline

- · We will review:
  - How just calculating new factors won't necessarily give you uniform and equitable assessments despite being within state standards
  - The effects of our newly calculated factors and how this relates to the individual properties that sold in terms of \$ variance and % variance
  - Reduction of appeals

-	

### Course Outline

- · We will Review:
  - What our sold properties are telling us in terms of market value and how we can use this information for our unsold properties
  - How to get to market value by making changes within your ecama systems

### Our Goal ????

- · Question:
  - What is the bottom line Goal that we hope to achieve through the completion of the trending process that is now required of assessors every year?

### Our Goal ????

- · Answer:
  - Hopefully, establish a true tax value as of the valuation date, for 2007 assessments it will be 1-1-06
  - Narrow the disparity between assessment values and purchase prices
  - Narrow the disparity between assessment values and market values for non-sold properties
  - Create an overall smaller variance in our nbhd's

### Our Goal???? · Question: - Does the method of just factoring the current cost and depreciation tables accomplish our goal for all types of neighborhoods? Our Goal???? · Answer: - Unlikely - The approach of just calculating a new market factor is unlikely to yield a True Tax Value for every type of neighborhood since the unadjusted costs and depreciation tables are based upon calculations from 1999. Neighborhoods · What type of neighborhoods does the method of just calculating a new factor work well for? · What type of neighborhoods does the method of just calculating a new factor not work well for? (i.e. what are your problematic type of neighborhoods)

### True Tax Value Definition

- · True Tax Value Defined as:
  - "The market value-in-use of a property for its current use, as reflected by the utility received by the owner or a similar user, from the property".

### Assessor Responsibility

- Page 2 of the 2002 Real Property Assessment Manual defines the assessors responsibility.
  - Manual defines the assessors responsibility.

     True Tax Value "It is this definition, therefore, that sets the standard upon which assessments may be judged. Although this assessment manual provides general rules for assessing property, situations may arise that are not explained or that result in assessments that may be inconsistent with this definition. In those cases the assessor shall be expected to adjust the assessment to comply with this definition and may ask the State Board to consider additional factors, pursuant to IC 6-1.1-31-5".

### Principles of Annual Assessments

- · Current market value implies annual assessments of all property
- · Limit tax shifts between property classes
- · Assessing officers should consciously reevaluate the factors that affect value
- · It is necessary to observe and evaluate
- · It is recommended that assessing officers consider establishing regular reappraisal cycles

### Sales Information

- Sales information is our #1 source of information for the majority of our properties
- It drives our current annual adjustment system

### Sales Chasing

 "Sales Chasing" is the practice of using the sale of the property to trigger a reappraisal of <u>that</u> property at or near the selling price

### Sales Chasing

- · Sales Chasing causes the following:
  - Invalid uniformity results in a sales ratio study
  - Invalid appraisal level results unless similar unsold parcels are reappraised by a method that produces the same percentage market value (appraisal level) as on the parcels that "sold"

	Prince and an Artist State of the State of t
	MANAGER STATE OF THE STATE OF T
	Children and American general consistent
	***************************************
4/10/1/	
	<del></del>

### Sales Chasing

 Unless similar unsold parcels are reappraised at the same level as sold parcels, sales chasing causes inequitable treatment of taxpayers by shifting the burden to taxpayers who have recently purchased property

### Sales Information

 This class is going to concentrate on what our sales information is telling us and how we can apply this information to the sold and unsold properties in our problematic neighborhoods

### Sales Disclosure Investigation

- Sales Disclosures drive the entire trending process
  - It is hard to trend, if not impossible without good sales data.
  - Each sales needs to be reviewed for complete list of parcels involved and validity.
    - This needs to be done immediately not a year later, when you are starting your factor calculations
    - Large Discrepancies (+ or 40% from current AV) need to have the property field reviewed immediately. Why the big difference?

### Sales Disclosure Investigation Validation: - Just data basing sales disclosures is not enough garbage in = garbage out - SDF's need to be validated and data based accurately per property class, etc. - You can not just in-validate every sale that you don't - For sales that are determined not to be valid indicate a reason in the database The DLGF is putting an enormous emphasis on matching the number from the SDF database to what is used on ratio studies Sales Disclosure Investigation Need to research Multiple Parcel sales - Don't immediately discard them due to being multiple parcels as many are valid sales · Need to research all Commercial and Industrial Sales

### **HANDOUTS**

- HANDOUT #1
  - Handout #1 calculates the market adjustment factor for the neighborhood based upon the recorded sales

### **HANDOUTS**

- Handout #2
  - Handout #2 is a ratio study for this neighborhood
  - The market adjustment factor of 1.77 has been applied to all improvements within the neighborhood

### **HANDOUTS**

- Handout #3
  - Handout #3 shows the variance in terms of dollars and percentage (Sales Price vs Total AV)

### Review of our NBHD

- This neighborhood has approximately 200 parcels
  - Do you feel that the entire neighborhood is uniform and equitable based upon our results from our sales in the ratio study which account for approximately 10% of all our properties?
  - Do you feel that we will have several unsold properties undervalued and overvalued?

### Review of our NBHD

- Do you feel that we will have some appeals as result of the current market adjustment factor (1.77) that is being applied?
- Is the factor causing the bad assessments or is it the poor base values that is causing our bad assessments?

### SALE OUTLIERS

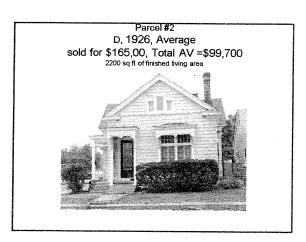

- Sales Outliers are sales that are having an adverse effect on the entire data set
- Within our dataset, there are a few sales that I would consider outliers
- We are going to concentrate on the first 4 properties, that are predominately driving this 1.77 factor

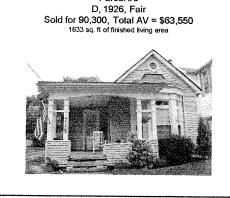

### **SOLD PROPERTIES**

- The following set of pictures are of properties within the neighborhood that sold
  - Information listed
    - Current Grade
    - · Current Effective Year
    - Current Condition
    - Sales Price
    - · Finished Living Square Footage
    - Total AV after applying mkt. adjustment factor

·
·
And the second s

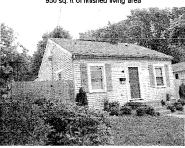

Parcel #3

### Parcel #4 D, 1926, Fair Sold for \$69,000, Total AV =53,700 950 sq. ft of finished living area

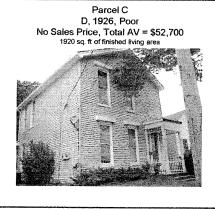

### Non Sold Properties

- The following set of pictures are of properties within the neighborhood, but did not sell.
  - Information Listed
  - Current Grade
  - Current Effective Year
  - Current Condition
  - Finished Living Area Square Footage
  - Current AV (1.77 mkt. factor applied)

Parcel A
D, 1926, Average
No sales price, Total AV =138,300
3044 sq. ft. of finished living area

### Residential Improvement Assessing

 Despite a general reassessment not being ordered, selected residential areas should be reviewed annually for accuracy bringing them in line with their purchasing prices.

### Residential Improvement Assessing

- Assessors need to use the various tools available to them
- Learn from your sales and then apply your knowledge to the other properties
  - Utilize the effective Age
  - Utilize condition
  - Utilize obsolescence
  - Utilize appraisals
  - Utilize previous appeals
  - Utilize sales per square footage calculations
  - Utilize sales on a per unit basis, etc.

Residential	Improvement
Asse	essina

- Goal:
  - Remember our goal is create assessments that are similar between sold / unsold property based upon sales & appraisals of similar properties
- · Concern:
  - For many of you, there maybe a reluctance to changing effective year as the manual only indicates that this is to be done if there is additional square footage added to the structure.

### ADDRESSING THE BASE ASSESSMENT

- To address the base assessment you need to look at the following:
  - Grade
  - Condition
  - Effective Year
    - probably the most important aspect of the base value as it has the biggest impact on the amount of depreciation being received

### ADDRESSING EFF YR

- How to address the effective year so that it brings our properties more in line with today's market value
  - FORMULA
    - <u>Sales Price</u> or <u>Desired Value</u> minus <u>Land AV</u> = our <u>True Tax Value</u>
    - <u>True Tax Value</u> divided by our <u>Mkt. Adj. Factor</u> = our <u>Remainder Value</u>

### ADDRESSING EFF YR

- Formula (cont'd)
  - The difference between our Remainder Value and our Replacement Cost divided by the Replacement Cost = our desired Depreciation Amount
  - Referencing our newly desired <u>Depreciation</u>
     <u>Amount</u> from the manuals depreciation tables will give us our desired <u>Effective Year</u>

### **HANDOUTS**

- Handout #4
  - Handout #4 address the effective year, condition and grade for our 4 properties
  - We are going to utilize our adjusted factor of 1.65

### **HANDOUTS**

- Handout #5
  - Handout #5 address the effective year, condition and grade for our 3 non-sold properties
  - We are going to use our adjusted market factor maintain our 1.65
  - We have determined through our sales analysis that on average properties in this nbhd are selling for approximately \$70 per square foot of finished living space

### **HANDOUTS**

- Handout #6
  - Handout #6 is a recalculation of our market adjustment factor
  - Having addressed 4 of our 5 sales outliers our new market adjustment factor is 1.65

### **HANDOUTS**

- Handout #7
  - Handout #7 reflects a revised ratio study after making the changes to our 4 parcels
  - We also made changes to our unsold properties based upon our sales information
  - The uniformity in our assessments are now more valid as we addressed not only the sold properties but also the un-sold properties

### **HANDOUTS**

- · Handout #8
  - Handout #8 is a comparison of our \$ and % variance
    - Top portion is with our original factor of 1.77
    - Bottom portion is with our revised factor of 1.65

### **RESULTS**

- In addition to greater uniformity, we have also decreased the potential for appeals
- We also increased our Total AV for the neighborhood
- Tax Burden is not being shifted to just those properties that sold
- Tax Rates will potentially fall

### **Data Basing**

- The more information you can data base the better your future trended years will be.
  - Sales
  - Appeals
    - Record the year of your data (i.e. based upon 2005 appraisal, 2003 – 2005 income/expense info, etc)
  - Appraisals
  - Income Information

### **Data Basing**

- Appeal data basing will provide you an extensive amount of valuable information
  - You can use the final determined value from the appeal in the same manner as you use sales information
  - This will just increase your sample size and it will now be reflecting properties that did not sell as this is where most of your appeals come from

### **Data Basing**

 Appeal data basing will also eliminate repeated appeals from the same taxpayer in the upcoming year

### Concerns/Questions

### 2007 Winter Conference

January 16 - 20, 2007

### TRENDING:

"A whole lot more than just new Factors"

Presented by Ken Surface Director, Nexus Group

### Course Outline

- · This course will cover:
  - Discussion regarding the work that is needed to be completed to properly trend all types of properties prior to calculating the basic residential market factors and submitting a ratio study

### Course Outline

- We will review:
  - Sales Disclosure Investigation
  - Neighborhood Arrangements
  - Land Value Determination
  - Residential Improvement Assessments
  - Outlier Resolutions
  - C & I Trending Techniques

### Course Outline

- This course will not cover how to calculate market adjustment factors and the completion of a ratio study
- A handout will be distributed demonstrating that despite being within standard, market adjustment factors can still lead to improper assessments
- This handout will emphasize the need to review residential properties and not just rely on calculated factors.

### Our Goal ????

- · Question:
  - What is the bottom line Goal that we hope to achieve through the completion of the trending process that is now required of assessors every year?

### Our Goal ????

- Answer:
  - Hopefully, establish a true tax value as of the valuation date, for 2007 assessments it will be 1-1-06
  - Narrow the disparity between assessment values and purchase prices
  - Narrow the disparity between assessment values and market values for non-sold properties

		Out of the second secon

# Our Goal???? Question: - Will applying the current cost approach methods as outlined in the manual allow us to achieve our goal? Our Goal???? Answer: - Unlikely - The cost approach is unlikely to yield a True Tax Value since the unadjusted costs are based upon cost estimates from 1999. - Utilizing these unadjusted costs will require either a large factor and/or overvalued land to get assessments close to value as of 1-1-06 True Tax Value Definition • True Tax Value Defined as: - "The market value-in-use of a property for its current use, as reflected by the utility received by the owner or a similar user, from the property".

## **Assessor Responsibility**

- Page 2 of the 2002 Real Property Assessment
  - Page 2 of the 2002 Real Property Assessment Manual defines the assessors responsibility.

     True Tax Value "It is this definition, therefore, that sets the standard upon which assessments may be judged. Although this assessment manual provides general rules for assessing property, situations may arise that are not explained or that result in assessments that may be inconsistent with this definition. In those cases the assessor shall be expected to adjust the assessment to comply with this definition and may ask the State Board to consider additional factors, pursuant to IC 6-1.1-31-5".

## Pro's & Con's of the Manual

- · Pro's
  - Manual will provide you basic cost approach methods that will allow to start with a base assessment for improvements.
  - Manual will provide you various means and methods to value land.
  - Manual will provide you various tables to calculate depreciation, etc.

## Pro's & Con's of the Manual

- · Con's
  - The Manual is set up to apply a valuation per the cost approach and not a sales approach or an income approach (i.e. its market value)
  - The manual reflects 1999 cost tables and not the current trending assessment year
  - Land valuation methods as outlined in the manual are merely basic calculations and may not necessarily give you the proper land value per sales information
  - Depreciation tables do not and can not distinguish between market areas within your own county

## **Court Decisions**

 There have been many recent court rulings referring to the "bottom line value" versus the manuals cost approach to value.

## **Court Decisions**

- 3 recent decisions that have ruled the "bottom line" value is what is important and not necessarily the methodology used by the assessor.
  - O'Donell v. Department Local Government Finance (Ind Tax, 9/21/2006)
  - Kooshtard Property VI, LLC v. White River Township Assessor (Ind Tax, 11/3/2005)
  - Eckerling v. Wayne Township Assessor (Ind Tax, 2/2/2006)

## Sales Disclosure Investigation

- Sales Disclosures drive the entire trending process
  - It is hard to trend, if not impossible without good sales data.
  - Each sales needs to be reviewed for complete list of parcels involved and validity.
    - This needs to be done immediately not a year later, when you are starting your factor calculations
    - Large Discrepancies (+ or 40% from current AV) need to have the property reviewed immediately. Why the big difference?

## Sales Disclosure Investigation Validation: - Just data basing sales disclosures is not enough garbage in = garbage out - SDF's need to be validated and data based accurately per property class, etc. - You can not just in-validate every sale that you don't - For sales that are determined not to be valid indicate a reason in the database The DLGF is putting an enormous emphasis on matching the number from the SDF database to what is used on ratio studies **NBHD** Arrangements · Past practice for many residential areas is to have arranged neighborhoods by legal description, meets & bounds, street names, etc. Residential neighborhoods need to be arranged by improvement types (examples) - Style - Duplex's - Mobile Homes - Rentals - Age Grades **NBHD** Arrangements · Geographic neighborhoods are suitable for residential properties if the house style / age is similar

 Failure to delineate your properties accordingly will lead to inaccurate

Sales of like properties need to be trended and applied to comparable properties

assessments

## **NBHD** Arrangements

- Commercial & Industrial properties should probably remain arranged by geographic areas
  - Within these geographic areas, you can arrange based upon lot sizes, road frontage
  - Influences can be applied to the base rates to adjust accordingly. (we will discuss this further, later in the class)

## **NBHD Arrangements**

- Utilizing use type to define a neighborhood sometimes works better than defining neighborhoods by geographic areas
  - Fast food establishments
  - Convenience markets/gas stations
  - Apartments
  - Industrial

## Land Value Determination

- Land Values need to be looked at each year with trending
  - The general tendency is still to undervalue land
  - Vacant sales are golden but many times hard to come by, unless it is a new subdivision
  - Failure to adjust the land accordingly will just lead to larger market adjustment factors being applied to the improvements
  - The larger the improvement factors, the greater the chance for inaccurate assessments

# Land Value Determination Question: - Which land pricing method is the best to use? • Front Foot Acreage · Square Footage Lot Value Land Value Determination Answer: - The one that gives you the best assessment per the property's market value Don't get caught up in the pricing method, but concentrate your efforts more on the values you achieve Only have one pricing method for each neighborhood If the lot sizes vastly differ, maybe they should be in a different neighborhood · Use Influence factors (both + & - influences) Residential land should be 12 – 18% of total sales price (minimum). More desirous locations (lakes, college campus areas, etc, this percentage will be a lot greater Don't make it more difficult than it has to be Land Value Determination · Land Values need to reflect what the total properties market value is worth · Commercial Land per the manual breaks land out into 4 categories - Primary

- Secondary

Undeveloped/UsableUndeveloped/Unusable

## Land Value Determination

- Your goal is to assess the entire lot at its market value
  - We have found that applying the same land rate for primary, secondary, and undeveloped/usable works the best to arrive at true tax value
    - Influences may have to be given to certain properties to bring them in-line with their market value
    - Additional neighborhoods may have to be created if certain lots are significantly different than the norm for your neighborhood.

## Land Value Determination

- The same land rate for each category will assist you in establishing a true tax value
  - Appeal discussions will be concentrated on what is the "bottom line value for the land"
  - It won't be focused on how an "X" amount of acres are used
  - Influences based upon Improvements types or corner lots can be applied to arrive at a true tax value

# Residential Improvement Assessing

- Despite a general reassessment not being ordered, selected residential areas should be reviewed annually for accuracy bringing them in line with their purchasing prices.
- · Sales Chasing
  - I'm sure many of you have felt like you are doing this

# Residential Improvement Assessing

- · Sales Chasing
  - Common Questions asked, "Isn't adjusting assessments based on the sale price, sales chasing?"
  - The answer is "NO" Sales chasing occurs when only the properties that sold are the ones that are adjusted.
  - If you take what you have learned from the properties that sold and apply that to the unsold properties as well, then this is not sales chasing – this becomes assessing

# Residential Improvement Assessing

- Assessors need to use the various tools available to them
- Learn from your sales and then apply your knowledge to the other properties
  - Utilize the effective Age
  - Utilize condition
  - Utilize appraisals
  - Utilize previous appeals

# Residential Improvement Assessing

- · Goal:
  - Remember our goal is create assessments that are similar between sold / unsold property based upon sales & appraisals of similar properties
- Concern:
  - For many of you, there maybe a reluctance to changing effective year as the manual only indicates that this is to be done if there is additional square footage added to the structure.

- Page 2 of the 2002 Real Property Assessment Manual
- · Court Decisions

## **Outlier Resolutions**

- What are Outliers and what do we do with them?
- · Outliers can be categorized in two ways
  - Outlier Sales Sales that don't make sense
  - Outlier Properties Properties that are not the norm for a particular NBHD

## **Outlier Resolution**

- · Outlier Sales:
  - These will often require a field inspection to determine what is wrong with the assessment or what is wrong with the SDF.
    - · MLS / Realtor data can help if available
      - Helps determine basement finish
      - Upgrades (appliances, cabinets, floor covering, etc.)
      - Attic Finishes
      - # of baths, etc
      - This isn't perfect data but often better than the assessors data

## **Outlier Resolution**

- Outlier Properties
  - Certain individual properties that are not the norm for a particular NBHD can be based upon
    - Grade
    - Age
    - Style
    - · Lot Size
    - Use
    - Etc.

## **Outlier Resolution**

- You need to make an attempt to compare these to other similar properties even if that means you are going outside of their assigned nbhd
- Resolution of these outliers can be achieved through applying influences, obsolescence or reassigning to another neighborhood
- Outliers need to be handled on a case by case hasis

## C & I Trending

- Commercial Review is much the same as Residential improvement review
  - Need to be reviewing a selected number of properties on an annual basis
  - Need to review for use type changes
  - Need to review for renovations that are not necessarily picked up in the new construction process
  - Many counties don't have a building permit system or they have a poor system – this will continue to cause problems as general reassessments will continue to be fewer and fewer

	477-1487-1487-1487-1487-1487-1487-1487-1

## C & I Trending

- Need to review the assessment to the sales price
- · Need to establish Income Databases
  - Income & Expenses
  - Leasing Rates
  - Gross Rent Multipliers
- · Need to review land rates
  - Land to Building ratio's

## C & I Trending

- Need to look into getting more up-to-date cost info
- We find that average commercial costs have risen more than 20% from 1999 to 2005.
- Residential properties don't necessarily need updated cost tables as sales are plentiful and the market adjustment factor is the resolution to the problem
- Commercial property sales are hard to come by and without updated cost tables all newly constructed improvements are probably undervalued from a cost approach

## **Data Basing**

- The more information you can data base the better your future trended years will be.
- You are required to data base sales disclosures
- · We have discussed Income Data Basing

## **Data Basing**

- You should also be data basing all appeals
  - Informal appeal changes
  - Appeals handled at the township level
  - Appeals handled at the PTABOA level
  - Appeals handled at the State and Tax Court level

## **Data Basing**

- Appeal data basing will provide you an extensive amount of valuable information
  - You can use the final determined value from the appeal in the same manner as you use sales information
  - This will just increase your sample size and it will now be reflecting properties that did not sell as this is where most of your appeals come from

## **Data Basing**

 Appeal data basing will also eliminate repeated appeals from the same taxpayer in the upcoming year

## Exterior Building Description - Building Facing 4th Street

Foundation	Concrete Slab
Framing	Brick and Block
Wall Finish	Brick and Block
Roof Cover	Rubber membrane
Gutters/Down Spouts	Aluminum
Windows	Fixed
Doors	Storefront and overhead garage
Parking Lot	Asphalt and Gravel
Sidewalks	Concrete
Landscaping	Typical
Miscellaneous	Covered Entry on West Side
Above Grade GBA	7,689 SF
Below Grade GBA	7,689 SF unfinished

General Condition: According to the assessor's records, the building was originally constructed in 1900. Aside from some new windows along Rogers Street, the building has not been significantly remodeled or renovated within the last five years. The effective age is estimated at 30 years and the remaining useful life is 30 years. The exterior of the building is generally in fair condition for a building of its age. The basement area is exterior access only and includes two loading dock wells for access. The basement showed signs of leaks during the inspection.

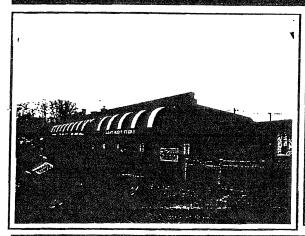

## Interior Building Description - Building Facing 4th Street

Wall Finish	Drywall, Block and Brick
Floor Coverings	Carpet and Concrete
Ceiling Finish	Acoustic Tile and Unfinished
Interior Doors	Wood and Metal
Lighting	Florescent and Incandescent
Misc.	Two overhead garage doors
HVAC	GFA w/ wall A/C and susp gas htrs
Water Heater	Yes
Electrical	200 amp, single phase
Security System	No
Sprinklers	No ·
Specialized Equip.	None

General Condition: The building includes two finished office spaces along Rogers Street and a retail area and a barber shop along 4th Street. The finished area is estimated at 50%. The warehouse portion of the building is unfinished with exposed bow trusses for the roof. The interior of the building is generally in fair condition for a building of its age.

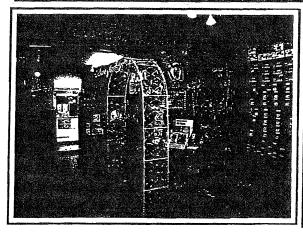

## Exterior Building Description - Building Facing Rogers Street

Our Median, COD & PRD are all within standard therefore we should be okay to apply the factor and let the assessment be calculated accordingly

its selling price. in our individual factors, therefore each of the individual sales that fall below or above the average are going to be assessed at a value sometihing different than You will notice that our individual factors have a range from 1.15 to 1.68 with the average being 1.36 (applied factor). This means that we have a very wide gap

Despite being within standard, properties can be extremely below or above their market value due as a result in wide gaps in the individual factors

price and the cost approach to value. You will need to do the following: To narrow this gap in individual factors, you need to look at the individual properties and determine why there is such a wide disperity in the sales

- 1. Does the grade accurately reflect the property
- 2. Does the effective year accurately reflect the property
- Does the condition accurately reflect the property
- Does the land value accurately reflect the property
- 5. Are the Improvements accurately assessed?

Constitution and the statutes of the Indiana General Assembly. Article X, Section 1 of the The foundations upon which this assessment manual is built are established by the Indiana Indiana Constitution requires:

just valuation based on property wealth, but the Clause does not require absolute and precise exactitude as to the uniformity and equality of each individual a system of assessment and taxation characterized by uniformity, equality and

Value, as expressed in this manual, seeks to operate. IC 6-1.1-31-6(c) goes on to state that: "True tax value is the value determined under the rules of the State Board of Tax both statutory and judicial requirements by providing a definition that measures property wealth, incumbent upon the State Board of Tax Commissioners to develop a definition that satisfies Commissioners." Given that the courts and statutes do not fully define true tax value, it is mean fair market value." It is within this structure, and that required by the courts, that True Tax IC 6-1.1-31-6(c) and 6-1.1-31-7(d) further define True Tax Value: "True tax value does not but is not fair market value

True tax value, therefore, is defined as:

utility received by the owner or a similar user, from the property The market value-in-use of a property for its current use, as reflected by the

with this definition and may ask the State Board to consider additional factors, pursuant to IC 6definition. In those cases the assessor shall be expected to adjust the assessment to comply arise that are not explained or that result in assessments that may be inconsistent with this Although this assessment manual provides general rules for assessing property, situations may It is this definition, therefore, that sets the standard upon which assessments may be judged. 1.1-31-5, to accomplish this adjustment.

except for owner occupied housing units, where true tax value will be equal to the value in exchanges, so that ask and offer prices converge, true tax value will equal value in exchange, purpose, true tax value will not equal value in exchange. In markets where there are regular sale prices, or in markets where owners are motivated by non-market factors such as the sales are not representative of utilities, either because the utility derived is higher than indicated much utility must be replaced to induce the owner to abandon the property. In markets in which more clearly represents the utility obtained from the property, and the ask price represents how maintenance of a farming lifestyle even in the face of a higher use value for some other True tax value may be thought of as the ask price of property by its owner, because this value O'Donnell v. Department of Local Government Finance (Ind. Tax, 9/21/2006)

The O'Donnells owned a home in the Briar Ridge subdivision. The subdivision straddled the corporate line between the towns of Dyer & Schererville, thus, some lots were on the Dyer side of Briar Ridge while others were on the Schererville side of Briar Ridge. The O'Donnells lived on the Dyer side of Briar Ridge.

The O'Donnells claimed several errors in the assessment of their land and house. For example: (1) they claimed the land rates and neighborhood factors should have been the same for both the Dyer and Schererville sides of the subdivision, (2) the grade of their home was too high, and (3) several "comparable" homes were assessed lower than their home.

The Tax Court held the O'Donnells "missed the point" and focused only on the methodology used by the DLGF to value their property but did not demonstrate the assessment did not accurately reflect the market value-in-use of their property.

The O'Donnells also argued the assessed value was too high and submitted a 2003 appraisal and 1997 construction cost information to support the argument. The Tax Court held these documents did not show an inaccurate assessment because neither reflected a January 1, 1999 value-in-use.

Kooshtard Property VI, LLC v. White River Township Assessor (Ind. Tax, 11/3/2005)

Kooshtard owned a gas station / convenience store that was built in 1983 and remodeled in 1995. The assessor assigned an effective age of 3 to the building and a condition rating of average. Thus, the building was given 9% physical depreciation.

Kooshtard challenged the effective age. By challenging the effective age, Kooshtard also argued it was entitled to 37% physical depreciation.

The assessor "tweaked" the effective age to take into account Kooshtard's modernization and maintenance of the building and to also make the assessment more in line with the 2001 purchase price of the property.

The Tax Court found that Kooshtard simply made arguments about the methodology employed by the assessor and did not demonstrate the assessed value was not a reasonable measure of market value-in-use.

In a footnote, the Tax Court said the assessor should have perhaps "tweaked" the condition rating instead of the effective age, but a technical failure to comply with the Guidelines did not render the assessment invalid so long as the assessment was a reasonable measure of true tax value.

Eckerling v. Wayne Township Assessor (Ind. Tax, 2/2/2006)

The Eckerlings owned a building that was originally built as a single family residence, but they currently used the property as an office for their company. No changes were made to convert the home into an office.

The assessment was based on the residential pricing guidelines. The Eckerlings argued the building should be priced from the General Commercial Residential (GCR) schedule because the building was used as an office.

The Tax Court ruled that the goal of the assessment system is to ascertain market value-in-use. It is not enough for a taxpayer to show that the assessor did not strictly apply the Guidelines (it is not enough for the taxpayer to focus strictly on the methodology used to arrive at the assessment), but the taxpayer must show the assessment does not reflect market value-in-use.

## STATE OF INDIANA

DEPARTMENT OF LOCAL GOVERNMENT FINANCE

INDIANA GOVERNMENT CENTER NÖRTH 100 NORTH SENATE AVENUE N1058(B) INDIANAPOLIS, IN 46204 PHONE (317) 232-3777 FAX (317) 232-8779

### MEMORANDUM

DATE:

October 2006

TO:

County Assessors

FROM:

Barry Wood

Director, Assessment Division

RE:

2006 Ratio Study Issues

50 IAC 21, the annual adjustment rule, requires all county assessors to conduct and submit to the DLGF a county wide ratio study after completion of annual adjustments. To date, the DLGF has received 44 Ratio Studies from throughout the state, with eight receiving approval. The Assessment Division's goal is to review and reply to the county's ratio study submission within two (2) weeks. The reply will either be in the form of an approval of the ratio study or a request for further information needed to review the study.

The following are suggestions and findings that we have found in reviewing the ratio studies:

- 1. A consolidated spreadsheet will help in our initial analysis and facilitate our review. Please do not submit a separate spreadsheet for each class of property or each township. Our preferred format would be one spreadsheet file with the first tab being a summary worksheet followed by separate tabs for each township. A township tab should show all property classes, or a separate tab for townships grouped together for a specific class. If you have already set-up your information to have tabs by class that would be acceptable too; please minimize the number of files and include a summary spreadsheet.
- 2. Please include the 2005 pay 2006 gross AV for land and improvements as well as the 2006 pay 2007 AV for land and improvements for all parcels used in the study.
- 3. In our review, we are comparing the number of sales used in the ratio study with a file analysis of the number of sales that could possibly be used from your data submissions to LSA and our Data Analysis Section. The biggest problem, to date, is the total number of sales significantly exceeding the number of sales being used in the ratio study. Please be sure to remove any duplicate sales (not re-sales, but multiple occurrences with the same date and price). While we

certainly do not expect all sales to be used (i.e. exempt sales, etc.), there are many sales that are not being used. "Trimming," or eliminating sales without a valid reason, is not an acceptable practice. Unless there is specific written notification and approval given for following the IAAO Standard on Ratio Studies on locating extreme outliers (see Section 6.6), all valid sales should be considered. For those classes of property where there are few sales, the IAAO Standard on Ratio Studies gives specific remedies for inadequate sample sizes (see Section 8.4).

4. We understand that certain software packages automatically invalidate or exclude multiple parcel sales; hence, many of those sales are not being included in the ratio study. Any valid sale where an assessment can be compared to the selling price should be considered. Be sure to include multiple parcel sales by summing the assessed values.

5. Land sales with subsequent improvements should also be included by

imputing the assessment as vacant.

6. It is also appropriate to expand the range of sale dates to include 2006 and 2003 and earlier years with appropriate time adjustments. If sales are time adjusted, please include the actual sale price in addition to the time adjusted price.

7. Note that 50 IAC 14-3-3 specifically excluded the practice of including performance audits in the trending process, therefore, any inclusion of appraisals must be documented and the IAAO procedure outlined in the IAAO

Standard (Section 9.6) must be followed.

8. As of September 30, 2006, the following 10 counties have not submitted sales data to LSA and DLGF for both 2004 and 2005:

- Bartholomew - Boone - Brown - Floyd - Jennings - Johnson

Knox - Scott Shelby - Vigo

We will not be able to proceed with the review and analysis of the ratio study for these counties until they are compliant with both years of sales data.

 For counties that have submitted sales data, please note that non-compliant data may delay the processing of your annual adjustment ratio study. Counties are encouraged to correct or otherwise address non-compliant issues.

10. The sales disclosure file submitted as part of the required data submission to LSA and DLGF from a county should contain the data as it was filed on the original sales disclosure. Therefore, any updated sales data submissions in the future that had changes in sales data caused by re-validation of the sales during the annual adjustment process should not include the changed data. Please contact the Data Analysis Section at <a href="mailto:data@dlgf.in.gov">data@dlgf.in.gov</a> for compliance issues and questions.

11. Please be sure to use the DLGF township and school district numbers, and not the county's numbers. These are available at

http://www.in.gov/dlgf/pdfs/List\_of\_townships.pdf and http://www.in.gov/dlgf/pdfs/2002School.pdf.

- 12. If necessary, land values could and should be modified (see 50 IAC 21-4-2) before application of annual adjustment factors. For example, we are seeing cases where unimproved classes are significantly below the median or contrary to the sales disclosure file data. The corresponding improved class is also showing a low median but still within the "allowable" range. Adjusting the land value component will most likely bring the values into line.
- 13. Unimproved land purchased for homesites should be valued at market value unless IC 6-1.1-4-12 "developers" statute applies. The assessments for these parcels may not reach market value based on the method suggested in the guideline (Chapter 2, page 69) unless the assessment is based on an excess acre rate based solely on sales of this type of property and not on traditional ratios (e.g. 15 20%). An alternative for reaching market value includes creating an undeveloped homesite rate and applying an undeveloped influence factor to a "homesite" acre; another option is to use a higher than traditional excess rate developed from only building lot sales, and then apply an influence factor to the parcels with dwellings where the excess acreage is inadequate in size or shape to allow for dividing the parcel and developing or selling an additional building lot.
- 14. The DLGF will be calculating the price related differential although this is not called for in submission under the equalization standard (50 IAC 14-8-1). We will expect the assessing officials to have implemented 50 IAC 21-11-1 (b).
- 15. The twenty-five (25) parcel limit is not in effect for the annual adjustment process. Any valid sales in townships with fewer than twenty-five (25) parcels in a particular class should be considered with a grouping of similarly assessed properties in another township or class.
- 16. Although many counties have contracted out the annual adjustment/ratio study process to a vendor, the county is ultimately responsible for the submission of and approval of the ratio study by the DLGF.
- 17. We would recommend either sending out the "Annual Adjustment" Fact Sheet we sent out in June (and posted on our website at <a href="http://www.in.gov/dlgf/news/annualFS.html">http://www.in.gov/dlgf/news/annualFS.html</a>) with your Notices of Assessment, or making it readily available to help answer general questions from taxpayers.

Please contact Barry Wood or Lori Harmon at (317) 232-3773 or e-mail <a href="mailto:bwood@dlgf.in.gov">bwood@dlgf.in.gov</a> or <a href="mailto:lharmon@dlgf.in.gov">lharmon@dlgf.in.gov</a> if there are questions regarding this memorandum.

## Valuing Residential Acreage Parcels Larger Than One Acre

Residential acreage parcels of more than one acre and not used for agricultural purposes are valued using the residential homesite base rate and the excess acreage base rate established by the township assessor. The excess acreage base rate represents the 1999 acreage value of land when purchased for residential purposes. The land value of the subject parcel should represent the January 1, 1999 market value in use in the neighborhood.

If the parcel has a dwelling, one acre is valued using the residential homesite value. The remaining acreage is valued using the excess acreage rate. There must be a residential dwelling unit on the parcel before the homesite acreage rate can be used.

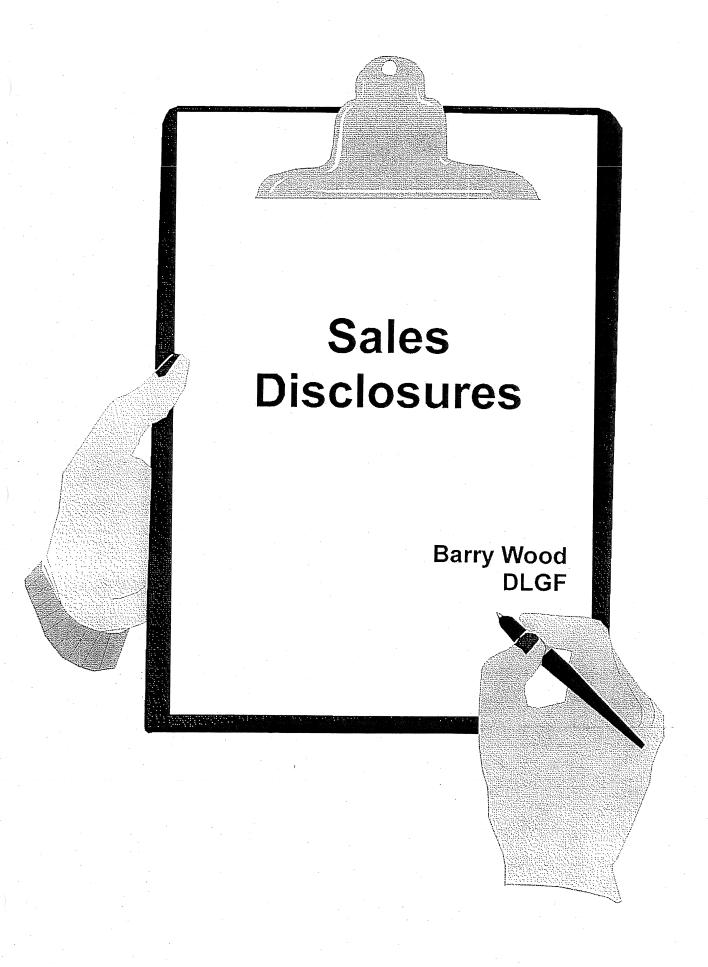

If there is no dwelling unit on the parcel, the amount of acreage in the entire parcel is multiplied by the appropriate excess acre rate. The excess acre base rate represents the 1999 acreage value of the land purchased for residential purposes in this neighborhood. The value of the subject parcel should represent the January 1, 1999 market value in use of the property.

The following examples illustrate how residential acreage is valued for parcels larger than one acre. These examples assume a homesite base rate of \$10,000 (per acre) and an excess acreage base rate of \$1,000 (per acre).

**Example 1:** A residential parcel has 1.36 acres and a dwelling. The value of the one acre homesite is \$10,000. The value of the excess acreage (1.36 acres - 1 acre = .36 acre) is calculated by multiplying the acreage by the excess acreage base rate (.36 acre x \$1,000 = \$360). The total value of the parcel is the sum of the value of the homesite and the excess acreage (\$10,000 + \$360 = \$10,360 = \$10,400 rounded to the nearest \$100).

**Example 2:** A residential parcel is vacant and has three acres. Its value is calculated by multiplying the acreage by the excess acreage base rate  $(3 \text{ acres } \times \$1,000 = \$3,000)$ .

**Example 3:** A residential parcel has 8 acres and a dwelling. The value of the one acre homesite is \$10,000. The value of the excess acreage (8 acres - 1 acre = 7 acres) is: 7 acres  $\times \$1,000 = \$7,000$ . The total value of the parcel is: \$10,000 + \$7,000 = \$17,000.

Combined Conference - County and Township Assessors

Sales Disclosures

Assessment Division Barry Wood January 2008

#### Sales Disclosures

- Sales Disclosures Proposed Changes:
  - Legislative
  - Administrative
  - Information and Education

\*Note: The following information is from a December 7, 2007 report to Senator Kenley, Chairman of the Commission on State Tax and Financing Policy from an Advisory Committee comprised of assessing officials, representatives from the DLGF, the Indiana State Bar Association, and the Indiana Land Title Association.

#### **Proposed Changes**

## **Legislative**

IC 6-1,1-5,3-2 Strike: (3) Documents for computiony transactions as a result of foreclosure or express threat of foreclosure, divideo, count order, condemnation, or protects and resurction (4), (5), and (6), an enumerated in (3) will no longer be exempt from full disclosure. COMJERN: The Assessors drive valuable trending information from foreclosure information regarding neighborhood character and the impact of foreclosure on market value. Assigned for the character of the transactions may actually be inclusive of this present value. Assigned for the character of the transaction such as a fixed or quick sale. Certain transactions as a result of dividing, count order, or products, such as mandated third-party sales, partitions and the like may well be indicative of the value. It condemnation, it is generally presumed that a falsing is based on appraisal of current market value. Mere dividicion of property pursuant to divide, or distribution to hers from extates, if for no consideration would be excluded as these are not within the direction of a conveyance.

NOTE: The DLGF has requested that some express language in bold type be included in the statute as that is a clear but a change has been made which would now require full disclosure of those transactions covered in (3).

IC 8-1.1-5.52

1.a. Amend the statute to require that a sales disclosure form be filed in connection with every brantler bantaction, whether or not the transaction is exclused from the orinicion of conveyance due to the lack of valuable consideration, or is a chartable strate, under 10-6-11-5-2. The statute exclusion is chartable strate, or the control of 5-11-5-2 the statute exclusion is chartable strated brantler from the definition of a conveyance and appears to endude exercise transactions from the requirement of any safe acclosure. If would be independent annature to make a chartable transfer is conveyance (see is and c, below for attending to the control of the contr

## **Proposed Changes**

1.b. Alemate 1 Add a proviso that where the transfer is charitable or enempt, the form would be tuly completed and should include the value of the get. COMMENT: Alemater 1 is proposed by the DLGF and supposed by the Assessors, who believe that valueable information can be gained by obtaining get value.

1.c. Attenute 2 Add a proviso that where a conveyance is charitable in nature or inservance. That the sales exclosure need not in such event contain the information cought under (CG-11-55-5(13), (14), (15)), or (16))present desynational relationship, proc. francing, or other like information. COUMENT Attenute 2 is supported by 158A and ILTA, where a transaction is event, it makes no sense to require information which would by its very nature be event from decidures, which would by its very nature be event from decidures, which would be inconditional with the intent of the status or eventually contain transactions.

Amend subsection (b) to provide that where there are must ple transferors or transferoes involved in a conveyance transaction, one of the transferors and one of the transferoes may sign rather than requiring all of the parties to sign.

## **Proposed Changes**

COMMENT: In certain circumstances, there may be many parties involved. As a practical matter, the salest disclosure form cannot make procedure for multiple eightaines and amountments or electronic medical adjustments become univoldy. An parties must be disclosed in the form in any seem. The Advisory Committee believes that one transfers and one transfers are parties as sufficient.

3. Amend subsection (b)(2) to insert a new paragraph (A), similar to the following and re-designate existing (A) and (B) as (B) and (C).

(A) the form contains the information required by Sect. S(a) of the statute as a applies to the conveyance transaction, but the form need not include other information required by the Department of Local Government Finance, subject to the obligation of a party to furnish or cornect such information in the manner required by and subject to the penalty provisions of Section 12. The form may not be rejected for failure to contain information other than that required by Sec. S(a), but it might be supplemented by the parity submitting it pursuant to Section 12.

Section 17.

MAJORITY REPORT: The purpose of this provision is to facilitate recording where the form contains at of the requirements expressly cased out in the stands but onto additional information which may be safed for by DLGF. Falser of a party to comply with a request for such omitted information within their (20) days will result in a penalty being a secsion MITORITY REPORT. The Manon County wassessor dissents from the Committee on this issue and excitate require lander of a fully completed and accurate form prior to recording of a transfer

26	,
1	

Annual C. G-1, 1-5.5-4(a) to clardy that no fee is the where the transfer is to a charry (excluded from conveyance under IC G-1, 1-5.5-1) or envolves an exempt transaction under IC G-1, 1-5.5-2.

COMMERCY. Since the Advisory Committee recommends that a sales disclosure form including the property discorption, an affirmative claim of enclusion's emption, and party information consistent with actually practice, by required for every transaction, anough sales price in not reported. However, escluded or exempt transactions should not be subject to a fee.

Amend Section 4 to be consistent with the non-Code feative split provisions - P.L. 245-2003 (Section 37), estended by P.L. 2785-2005 (Section 31) which mandates a \$10 fee (recover change to subsection (a)), with a \$0350 split between the County and the State (requires change to subsection (b)).

COMMENT. The statute provides for a \$5 fee and an 8020 split white the non-Code provisions amend that to a \$10 fee and a \$0%0 split. The non-Code provisions should be codified consistent with the actual law and practice.

### **Proposed Changes**

IC 6-1,1-5,5-5

Add a new subsection, preferably as new (1) or (2) which requires the legal description of the property and rehunder other subgrazayable accordingly.

COMMENT: The legal description is a critical cross-effective to determine the accuracy of list. particle humbers presented, to determine of the property consists of muchole tail practic, or is a solid particle. This information is currently required by DLGF and the Assessors on the safet particle. The anomalies amount of the purpose of the statistic that it ought to be codified as a requirement.

IC 6-1.1-5.5-6 Amend (a)(2) by replacing 4 with language similar to the following 

### **Proposed Changes**

KG 4.1,4.4.4.10
Section 9 provides that the sales disclosure form be attested in writing under paratible for perpay. Perjay is a Class C felony. Section 10 provides that a person who intentionally sturned table information on the membership of the centain information, or a public official who acts sentially, commits a Class A misdomeanor. These two (2) Sections appear to be inconsisted and consideration should be given to amendment of Section 10 to increase the paratise contained in that Section for flatification of information, seen though that person may not be a spring party, as Class C fellowy consistent with the pensalty in Section 9.
COUMENT: Falsification of sales disclosure information, whether by a signing party, another person or an official is a serious offense. The Committee believes that the pensalty for doing so outply to be equipped.

IC 6-1,1-6-12 Delete Section 17(a) to be consistent with the Committee proposal that at conveyances, whether excluded or exempt, require a sales disclosure form and imposes the penalty under subsection (b) on a party who fails to correct an error or omission within their (30) days after notice, where recording has been permitted notificationaries an omission or error. Replace Section 17(a) with a new subsection which provides something sentant to the

Sec. 12(a) A party to a conveyance who '(1) fires a disclosure form which does not contain all of the information required by the form, applicable to that transaction, or fires a disclosure form which contains induced in Frontaining a consolicated city, or the country assessor in any other country, and (2) false to fire a control section to be country assessor in any other country, and (2) false to fire a control section shows from which fively complete went and other requirements of the chapter, within their (30) days of the olse of such notice, in subject to a requirement of the chapter, within their (30) days of the olse of such notice, in subject to a providy in the amount determined under subsection (6) that is asked disclosure form the billion commochant the early convergence of an interest in real retails, subject to acclusion for the convection with every convergence of an interest in real retails, subject to acclusion for the stable be invived to provide that is olong as the rems specified by stables are included in the stable be invived to provide that is olong as the rems specified by tables are included in the stable disclosure form would be permitted notemestanding that certain firms prescribed by DLCF may be contited or inaccurate.

by ULDF may be omitted or inacturate. Since a sales disclosure form would always be required, then subsection 12(s) is no longer necessary, but since a leafest disclosure form might substantially comply if it contains all of the stationary management of the stationary management of the property of the stationary management of the contains a stationary management of the st

## **Proposed Changes**

Multiple Parcels/Separate Sales Disclosure. The Advisory Committee ceeks apocific instruction on this matter from Legislative Services Agency (LSA). It would appear the statutory provisions are ambiguous as to the question. Please note that the Advisory Committee was divided on this naive so that both Agont part Minnery Reports are included if LSA feels that this matter can be handed through the advincest Reports are included if LSA feels that this matter can be handed through the advincestable process alone, it is requested that it so educes. It is earlier bankactions amonthing multiple parcels, each parcel would recover a separate sales acclosure from. The purchase price for each parcel would recover a separate sales acclosure from. The purchase price for each parcel, would necessary to the dearning and could result in inaccuraces. The purchase price for each parcel would have been added to the parters of the parters of

### **Proposed Changes**

However, where multiple contiguous bracts are involved, ILTA supposts that one sales disclosure form, feating an eggregate purchase price, but with an additional form page promulgiated by LICG for such purpose, permit merely the stating of each configuous parcel. ILTA believes that approximation of value will be not less problematic for the parcel, possibly more problematic, and would add undue cost and burden to the parties. ILTA presented an example of a developer acquiring 15 comptious parcels of the stand in a single stransaction for a shopping center. Whold the frontage be more valuable, the portion where the buildings were surring, would the strended patient for the service valuable? ILTA believes that a single form page for fatting multiple contiguous parcels is sufficient.

The Advisory Committee would request the assistance of the Legislative Services Agency in the diatory of proposed legislation consistent with its recommendations and offers its continuing assistance in review and esting of the proposed language.

12

#### **Administrative Revisions**

Data Improvement: Improved electronic protocol consistent with the statewide protocol scheduled to take effect January 1, 2009.

scheduled to take effect Lancary 1, 2009

COMMERT: DIGE is actively presured this project

2. Form improvements (form attached)

(a) Part 1, Proporty Transferred move acreage/fot size to Part 3, County or Township

Assessor, to be fixed in by the appropriate efficial from the County rescord.

(b) Part 1, Conditions (i) Move excluded everigit translations, Items 12 - 21, to a separate order.

(s) Item 7, Land Contracts, change Dated to either Execution Date or Contract Date to himsh-accurate information as to the price determination date, and clarify in the instructions.

accusate information as to the price determination date, and clarity in the instructions (NOTE: A second alternative levelud be to list the stated Malariery Date under Conditions, him 7, then in Section 3, Siles Data, insert the date of execution as the Contract Date, just as you would for a regular tables thancation (in) Ada the words including solely non-insted stock to Rem 15 to conform to the statute (iv) Ada the words or observanced institution from Bern 18 to conform to the statute (iv) in Item 19, remove the words or discounted to conform to the statute

13

#### **Proposed Changes**

(iii) Assuming that IC 6-1.1-5-2(3) is removed from list of exempt transactions, revise form upon effective date

(vs) Make all questions on the form require a Yes or No answer and add an additional column for that purpose

(c) Part J. County or Township Assessor

(c) Part J. Courty or Township Assessor (d) Add sareagent ruse from Part 1, Property Transferred (see (a) above) (e) Add a line and boves where the appropriate fee to be collected may be calculated and intended by the Assessor COMMERT. These changes (other than the one change in exempt status requiring statutory amendment) are recommended by the Advasory Committee to DLGF for immediate engineeration.

ALPRIMERSON

3. Improved instructions/FAQ\_DLGF is in the process of remainly and clarifying the softward to the Sales Disclosure Form and the FAQ advisory. DLGF is wearing in conjunction with the Assessors, ILTA, and ISBA on this project and is expecting its completion.

## **Proposed Changes**

#### Information and Education

The Animory Committee noted that, while the FAQ is posted on the DLGF website, it is not necessarily easily accessable and if has not been widely disseminated to the Assessors and ILTA and ISBA. The preparers of the bulk of sales disclosure forms filed in connection with accessarily prepared distribution, upon revision of the sales disclosure form and instructions, and the FAQ, as they occur:

1. DLGF will publish the revision for the sales disclosure form and instructions, and the FAQ is they distribution will be given to more astimative public on its web page.

2. DLGF will distribute experience and aritmatuse published on the web page.

County Assessors Association, ILTA and ISBA.

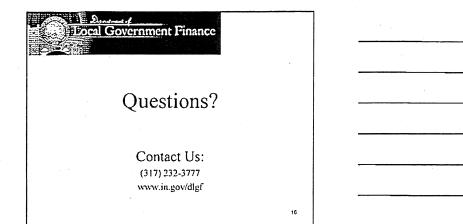

- Courty Assessors Association, IETA and 1904.

  3. The organizations receiving the information from DLGF will their discernizate that information to their membership through first serves, educational programs, newtletters, and

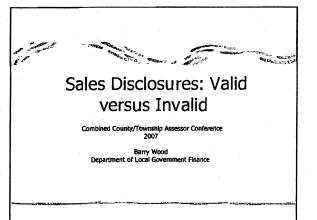

COMMENT. The Advisory Committee believes that if the requirements are clear, and the information is world costituted to the appropriate sources, greater unformity in procedure and a greater level of compliance on the part of the form preparers can be achieved, reducing delays in the process.

15

\* "Before filing a conveyance document with the county auditor under IC 6-1.1-5-4, all the parties to a conveyance <u>must</u> complete and sign a sales disclosure form as prescribed by the department of local government finance under section 5 of this chapter." (Our emphasis)

1

- The prescribed form is State Form 46021, "Sales Disclosure Form", which was revised in July, 2006.
- The first three lines ask for the parcel numbers. If more than three parcels are being transferred, they can be listed on a separate sheet so long as the required information is included.

## Sales Disclosures

r If only a portion of the parcel is being sold, then the circle on the far right needs to be filled in. (For example, a person owns ten acres, but is only selling two acres, or someone owns three lots and is only selling one of them.)

## Sales Disclosures

- The address line is for the <u>address of</u> the property being sold (street or road address, city, state and zip code).
- At the far end of the address line, it asks for the number of parcels included in the sales disclosure. This is a check to make sure that all parcels being conveyed are listed.

- In the "Conditions" section, the buyer/seller is asked to identify all the conditions that apply, filling in the appropriate circle and any blanks, if necessary.
- Any special conditions or uses may be identified on an additional sheet and attached to the form.

## Sales Disclosures

- 1. Buyer is an adjacent property owner he owns the land next to the subject property and is purchasing it for whatever reason.
- 2. <u>Vacant Land</u> self explanatory; the land has no structures and/or water or septic system on it.

## Sales Disclosures

- Exchange for other real property ("Trade")
   Grantee and Grantor are switching properties.
- 4. <u>Seller Paid Points; amount if applicable</u> if there are seller concessions, such as paying part of the closing costs, the dollar amount needs to be listed.

5. Change planned in the primary use of the property? Is vacant land going to be used for a subdivision? Is a business going to build a factory? Is an odder home going to be divided into apartments? This alerts the assessor that the sale may need to be analyzed based on the new use and the property will need to be checked during the next annual maintenance period.

## Sales Disclosures

 € 6. Existence of family or business relationship between buyer and seller the parties are related or business partners, or a relationship exists. This alerts the assessor to the fact that this may not be an arms-length transaction.

## Sales Disclosures

What is an arms-length transaction?

- \* The parties are unrelated;
- \* There is no undue stimulus;
- The property has been exposed to the market for a reasonable amount of time;
  The buyer and seller are acting prudently and knowledgeably in their own best interest (not under duress); and
  Payment is made in a manage as trade.
- Payment is made in a manner as typically available and not subject to special financing or

\* 7. Land Contract Dated: - A sale where the seller retains the deed until the contract terms are satisfied. If the buyer defaults, the property usually reverts to the seller and any payments may be lost. These are also known as installment sales or contracts for deed. If there is a land contract, enter the date of the contract.

13

#### Sales Disclosures

\*\*8. Personal property included in the transfer; amount if applicable – Items that are not attached (built-in or affixed) to the real estate (land and buildings). Examples include washers/dryers, window treatments, inventories, machinery, boats and other vehicles.

14

#### Sales Disclosures

• 9. Significant physical changes to property between March 1 and date of sale – are any buildings being built or torn down; any other improvements made to the property; or anything else that would cause the assessment of the property to change?

- 10. Non-Warranty deed; specify type if the property is not being conveyed by warranty deed, what type is being used?
- # 11. Partial Interest if the conveyance is not for 100%, then explain the circumstances, and the interest being conveyed.

16

# Sales Disclosures

The next section of items (12 –21) must be filled out where applicable, even though the filer is not subject to the filing fee if any of the items apply.

17

666

#### Sales Disclosures

- 12. Security interest documents such as mortgages or trust deeds.
- 13. Leases less than 90 years.
- 14. Documents resulting from foreclosure, or express threat of forecbsure, divorce court order, condemnation, probate or other judicial proceedings. Note that sales subsequent to these actions do not fall under this category and are generally required to pay the sales disclosure fee.

- \* 15. Agreements and other documents for mergers, consolidations and incorporations.
- 16. Quitclaim deeds not serving as a source to title.

# Sales Disclosures

- \*17. Documents involving the partition of land between tenants in common, joint tenants, or tenants by the entirety.
- 18. Transfer to a charity, not-for-profit or government institution.
- \*19. Transfer for no or discounted consideration, or gift.

# Sales Disclosures

- 20. Rerecording to correct prior recorded document.
- 21. Easements, right-of-way grants.

- The "Sales Data" section is one of the most important parts of the form.
- The date of the sale (the date on which the parties agreed to a sale price).
- Sales price the actual amount of money the grantee paid the grantor for the property being transferred. This MUST BE the true and correct amount.

22

#### Sales Disclosures

On Page 2, the last section of Part 1 asks for the signatures of the buyer and seller, the date they signed the document, and their telephone numbers.

THE FORM MUST BE SIGNED BY BOTH PARTIES

#### Sales Disclosures

If, for any reason, the parties do not agree on the information to be included on the completed form, each party may sign and file a separate completed form.

Part Two of the form is for the County Auditor to file stamp the form, indicate that it is complete, and enter the date the property was transferred in the Transfer Book.

25

# Sales Disclosures

Part Three is for the County or Township Assessor to note any major physical changes to the property, list the assessed value, the property class code, the neighborhood code, and the DLGF assigned Taxing District number.

26

# Sales Disclosures

If anyone other than the buyer/seller or an attorney of the buyer/seller is signing the form, a properly executed "Power of Attorney" form must be completed and attached.

intentionally falsifies or omits any information required on the form commits a Class A Infraction. In other words, it's against the law.

28

#### Sales Disclosures

- The county auditor is responsible for collecting the filing fee.
- The county auditor is also responsible for ensuring that all parties to the conveyance have completed and signed the sales disclosure form as required. Some counties require the County Assessor to review/approve the Sales Disclosure form before filing it with the County Auditor.

29

# Sales Disclosures

The county auditor may not accept the sales disclosure statement if the statement is not signed by the buyer and seller. (In the case of multiple sellers and/or buyers, only one seller and one buyer are required to sign.)

- The buyer or seller fails to completely fill out their designated portion of the form, the county auditor may not accept the conveyance document.
- An incomplete sales disclosure, along with the conveyance document should be returned to the person attempting to file the form.

# Sales Disclosures

# By law (IC 6-1.1-5.5-6) the county recorder "shall not record a conveyance document without evidence that the parties have filed a completed sales disclosure form with the county auditor."

Contract sales are not exempt from the sales disclosure filing. A form needs to be filed at the beginning of the contract (when either the contract or a memorandum is recorded), and again when the deed is issued at the end of the contract term to convey title.

Telephone numbers are required to be given. However, telephone numbers on this document are considered confidential information. If any copies are shared with the general public, the telephone numbers must be permanently removed from the copies.

34

## Sales Disclosures

Social Security numbers are not required, but if they are given, they also are considered confidential, and must be permanently removed from any copies that are shared with the public.

35

#### Sales Disclosures

Other than telephone numbers or Social Security numbers, the sale disclosure form is public information, and copies are required to be made available to the public upon request.

The filing fee is \$10 for non-exempt transactions. Some counties may charge a \$5 "Auditor's Endorsement Fee" per legal description, while some counties treat a multi-parcel transaction as one conveyance and only one fee is collected. Also, Marion County has a new \$5 transaction fee for electronic filing and payments.

37

# Sales Disclosures

\* On an exempt transaction, only one signature (either buyer or seller) is acceptable. (Items 12-21 on the form)

38

# Sales Disclosures

- \* Misdemeanors and infractions:
  - \* A person who knowingly and intentionally:
    - Falsifies the value of transferred real property;
       or
    - Omits or falsifies any information required to be provided in the sales disclosure form; commits a Class A misdemeanor.
    - Possible sentence not more than one year imprisonment and not more than a \$5,000 fine.

- A public official who knowingly and intentionally accepts:
  - A sales disclosure document for filing that
    - · Falsifies the value of transferred real property;
    - Omits or falsifies any information required to be provided in the sales disclosure form; or

#### Sales Disclosures

- A conveyance document for recording in violation of IC 6-1.1-5.5-6 commits a Class A infraction.
- Possible judgment of not more than \$10,000 may be entered by the courts.

(This section pertains to the county auditor and the county recorder.)

41

# Sales Disclosure

- # What is a conveyance document?
- "Indiana Code 6-1.1-5.5-2 defines
  "conveyance document" as "any
  document, deed, contract of sale,
  agreement, judgment, lease that
  includes the fee simple estate and is for
  a period in excess of ninety (90) years,

quitclaim deed serving as a source of title, or other document presented for recording, that purports to transfer a real property interest for valuable consideration."

43

# Sales Disclosures

 Conveyance Documents do not include; but require disclosures without a fee:

- Security interest documents, such as mortgages and trust deeds;
- \* Leases for a term less than 90 years;
- Documents for compulsory transactions as a result of forecbsure or express threat of foreclosure, divorce, court order, condemnation or probate.

4

#### Sales Disclosures

- Documents involving the partition of land between tenants in common, joint tenants, or tenants by the entirety.
- \* Agreements or other documents for mergers, consolidations, and incorporations involving solely nonlisted stock.
- ⇒ Quitclaim deeds not serving as a source of title.

#### # How are they used?

The county assessor or other assessing official <u>must</u> verify the accuracy of the information on the form. This can be done in several different ways – calls to the seller, calls to the buyer, calls to the title company, a survey form – whatever method the assessor finds that works.

40

#### Sales Disclosures

Accurate assessment information benefits everyone by keeping the assessed value accurate, which keeps the tax rate accurate, which has everyone paying their fair share.

47

#### Sales Disclosures

#### Valid versus Invalid Sales

- Now that we've covered the basics, who and what distinguishes a valid sales disclosure form to be used in the annual adjustment process and the ratio study?
- Great deference is given to "Home Rule," whereby the local officials are empowered to make the determination without approval from the State.

- However, based on the preceding information, you may want to consider using a Sales Disclosure in the annual adjustment process or the ratio study if you know/are certain through the verification process that:
  - \* It was an arms length transaction.
  - \* The property was not sold or bought under duress.
  - . The property was exposed to the open market.

49

# Sales Disclosures

FSome other points to consider when determining whether or not a sales disclosure form is valid or invalid:

- Sheriff Sales: If there is a neighborhood or area that has a substantial number of foreclosures, the Sheriff Sales may be used because it reflects the predominant market conditions.
- Vacant Land Sales and the Developer's Discount: If the builder is buying many lots at one time and filing separate disclosures on each lot, often the price is merely an allocation to each disclosure and may not be reflective of the value for that specific lot.

50

# Sales Disclosures

- Individual versus Title Company completion of the form: Does it matter if a person selling the property by himself files the Ses Disdosure instead of a Title Company? It may not necessarily invalidate the sale, but a prudent purchaser would have title insurance, and you may want to "hed flag" these sales disclosures for further review.
  Netabloom before attacking a manager of The
- Neighbors buying adjoining property: This ray not necessarily invalidate the sat; however, the assessor should verify if thesale was an arms length transaction, exposed to the open market, etc.
- Sales between friends and relatives: Again, It could be a valid sale
  if there was exposure to the open market, but further review is
  necessary.

- Multiple Parcels: Multiple parcel sales should be used in the analysis and ratio study by summing the assessments and comparing that total to the sale price or the time adjusted sale
- "I can't believe that person would have paid that much for that property": As part of the review proces, your job is to verify the accuracy of the sabs disclosure, not to pass judgment on whether or not you think the buyer paid too much (or too little) for the property. Was it a valid sale that was an arm's length transaction?
- You can not invalidate the sale because "you don't think it looks right;" there must be a reason it is invalidated
- a "I did not think the price looked right, so Echanged the amount on the sales disclosure form": See the pertinent part regarding committing a Class A Infraction.

# Sales Disclosures

In October 2006, the DLGF sent a memo to the County Assessor's detailing some common issues and problems that occurred with the ratio studies. Some of the points included:

In our review, we are comparing the number of sales used in the ratio study with a file analysis of the number of saleshat could possibly be used from your data submissions to LSA and our Data Analysis Section. The biggest problem, to date, is the total number of sales signficantly exceeding the number of sales being used in the ratio study.

Please be sure to remove any duplicate sales (not re-sales, but multiple occurrences with the same date and price). While we certainly do not expect all sales to be used (I.e. exempt sales, etc.), there are many sales that are not being used. "Trimming," or eliminating sales without a valid reason, is not anacceptable practice.

# Sales Disclosures

Unless there is specific written notification and approval given for not following the IAAO Standard on Ratio Studies on locating extreme outliers (see Section 6.6), all valid sales should be considered. For those dasses of property where there are few sales, the IAAO Standard on Ratio Studies gives specific remedies for inadequate sample sizes (see Section 8.4).

We understand that certain software rackages automatically invalidate or excludemultiple parcel sales; hence, many of those sales are not being included in the ratio study. Anyvalld sale where an assessment can be compared to the selling priceshould be considered. Be sure to include multiple parcel sales by summing the considered. assessed values.

- Land sales with subsequent improvements should also be included by imputing the assessment as vacant.
- It is also appropriate to expand the range of sale dates to include 2006 and 2003 and earlier years with appropriate tine adjustments. If sales are time adjusted, please include the actual sale price in addition to the time adjusted price.
- Other things to ponder:
  - Realtor data (i.e. Multiple Listing Service—MLS) is a good source to verify sales information. If possible, you may want to contactour local Realtor's Association to try and work out an greement to share information/acess to records.

# Sales Disclosures

- Sales may be used for analysis even if they are assessed on an agricultural land tasts if you impute the valuethat would be in place had the parcel not been a farm.

  Re-engineer your workfow so splits get worked promptly and the parcels will be able to be entered in the sales file with the new parcel number.

  Consistency is the key to ensuring all valid sales are considered in the annual adjustment process!

#### **INSTRUCTIONS**

Indiana law requires a sales disclosure form to be completed when a conveyance document (see definition below) is filed with the county auditor. The county auditor may not accept a conveyance if (1) the sales disclosure form is not included with the conveyance document; or (2) the sales disclosure form is incomplete. A person filing a sales disclosure form shall pay a fee of ten dollars (\$10.00) to the county auditor.

#### PART 1: BUYER AND SELLER INFORMATION

Property Transferred Information. Either the buyer/grantee or the seller/grantor should provide the parcel number(s) (including all dashes and decimals), full address, tax billing address, lot size, and legal description of the parcel(s) transferred. A legal description is especially important for metes and bounds descriptions and new parcels. If the transaction consists of more than three parcels, an additional list of parcel numbers and lot sizes must be attached to this document.

Sales conditions/items. The information in this section is used to determine sales characteristics, establish market value, determine applicability of the sale and for use in ratio or other studies. The appropriate circle or circles should be filled in for all conditions/items that apply to the sale. With regard to personal property (see definitions below), the buyer or seller must enter an estimated value of the personal property included in the sale. Similarly, the buyer and seller must enter the amount of seller paid points as applicable. Please note that while indicating that certain conditions/items will result in not paying a filing fee, the buyer/grantee or seller/grantor is still responsible for completing the form in full.

Sales Data. The date and sales price of the property transfer is to be printed in the spaces provided. Any unusual or special conditions of the sale that may affect the sales price or terms of the sales agreement should also be described.

Seller/Grantor Information. Seller(s)/grantor(s) are to provide the full name and address for seller(s) or entity as applicable. If there are more than two individuals or entities involved in the transaction, additional ownership information must be included in an attachment to this form. The seller/grantor must also provide the name, address, and telephone number of the preparer of the form.

Buyer/Grantee Information. Buyer(s)/grantee(s) are to provide the full name and address for buyer(s) or entity as applicable. If there are more than two individuals or entities involved in the transaction, additional ownership information must be included in an attachment to this form. The buyer/grantee must also indicate whether the property will be used as a residential primary residence.

Signature and Verification. The buyer/grantee, seller/grantor or their representatives must sign one (1) sales disclosure form, or if the parties do not agree on the information to be included on the completed form, each party must sign and file a separate form. If anyone other than the buyer/seller or an attorney of the buyer/seller is filling out the form, a properly executed Power of Attorney must be completed and attached. A person who knowingly and intentionally falsifies or omits any information required on this form commits a Class A infraction.

#### PART 2: COUNTY AUDITOR RESPONSIBILITY

The county auditor is responsible for collecting the filing fee as well as ensuring that all parties to the conveyance have completed and signed the form as required. The county auditor may not accept the sales disclosure statement if the statement is not signed by the buyer or seller. If the buyer or seller fails to completely fill out their designated portion of the form, the county auditor may not accept the conveyance document. The county auditor must also confirm the date the property was duly entered for transfer.

#### PART 3: COUNTY ASSESSOR INFORMATION

The county assessor is responsible for determining whether or not significant physical changes have been made to the property between March 1 and the date of sale. The county assessor is also responsible for entering property class or use codes, the proper department of local government finance taxing district number, the current assessed value, and neighborhood code information. The county assessor and/or other assessing officials are responsible for verifying the sale as well (note that verification is not required prior to submitting sales data to the DLGF). Sales disclosure forms provided in response to public records requests should not include phone numbers.

#### **Definitions**

Conveyance Document means any document, land sale contract, deed, quitclaim deed serving as a source of title, or other document presented for recording, that purports to transfer a real property interest for valuable consideration.

Personal property – items that are not attached (built-in or affixed) to the real estate (land and buildings). This might include items such as washers, dryers, window treatments, stoves and refrigerators. Other items considered personal property are boats and other vehicles, inventories (livestock, goods in process or for trade, or agricultural commodities) and machinery used in farming or manufacturing.

Listed below are certain deductions and credits that are available to lower property taxes in Indiana. Taxpayers may claim these benefits by filing an application with the Auditor in the County where the property is situated. The previous tax bill will facilitate filing, but it is not required. Applications for deductions against real property must be filed on or before June 10 to be effective for taxes payable in the following year. The deadline for mobile and manufactured homes that are not assessed as real property is March 2 unless noted below. The ownership must be the recorded as of March 1st. Individuals that purchase property, or record a transfer or mortgage document after March 1 may file for the deductions at the earliest opportunity, but the deduction will not apply until the following March 1st assessment date. The deduction will appear on the tax bill the year following the assessment date. For additional information on these and other benefits, please consult Indiana Code 6-1.1-12 and 6-1.1-20.9.

DEDUCTION (Indiana Code)	MAXIMUM AMOUNT ***	ELIGIBILITY REQUIREMENTS	
Mortgage (6-1.1-12-1b)	3,000	1) reside on real property located in Indiana. Includes mobile and manufactured homes; and 2) must have owned real estate by March 1 of the current property tax year. 3) A new application must be filed whenever a loan on real estate is refinanced.	
Homestead Credit (6-1.1-20.9) *	20% of net tax bill *	1) reside on real property located in Indiana, includes mobile and manufactured homes; 2) credit against the taxes attributable only to the assessed value for the first acre and the dwelling and garage only; and 3) must have owned real estate by March 1 of the current property tax year.	
Homestead Standard Deduction (6-1.1-12-37(b))	35,000	1) reside on real estate, including mobile and manufactured homes; 2) only the first acre and the dwelling and garage allowed; and 3) must have owned real estate by March 1 of the current property tax year.	
Over 65 ( 6.1.1-12-9)	12,480	1) reside on the real estate, includes mobile and manufactured homes; 2) at least 65 by December 31st of the year preceding the application year; 3) combined adjusted gross income not exceeding \$25,000; 4) one year of ownership prior to March 1 of the current property tax year; and 5) assessed property value not exceeding \$144,000. 6) Surviving, unremarried spouse at least 60 years of age if deceased was 65 at the time of death.	
Blind (6-1.1-12-11;12)	12,480	1) reside on the real estate, including mobile and manufactured homes; 2) blind; 3) taxable gross income not exceeding \$17,000; and 4) must have owned real estate by March 1 of the current property tax year.	
Disabled (6-1.1-12-11)	12,480	1) reside on the real estate, including mobile and manufactured homes; 2) disabled; 3) taxable gross income not exceeding \$17,000; and 4) must have owned real estate by March 1 of the current property tax year.	
Disabled Veteran (6-1.1-12-14;15)	12,480**	1) owns real and/or personal property in Indiana; 2) served in U.S. military service for at least 90 days and honorably discharged; 3) surviving spouse may apply; 4) either totally disabled or at least age 62 with at least 10% disability; 5) written evidence of the disability; 6) assessed value of real and personal property combined is not greater than \$113,000; and 7) must have owned real estate by March 1 of the current property tax year.	
Veteran with Service Connected Disability (6-1.1-12-13;15)	24,960**	1) owns real and/or personal property in Indiana; 2) honorable discharged after serving in U.S. military during a war, 3) service connected disability of at least 10% with written evidence of disability; 4) must have owned real estate by March 1 of the current property tax year. 5) surviving spouse may apply;	
Veteran World War I (6-1.1-12-17.4)	18,720**	1) resides on real estate, mobile or manufactured homes unless in a nursing home or hospital; 2) be a veteran of World War I; 3) assessed value of the residence property does not exceed \$163,000; and 4) own the real estate for at least one year prior to March 1 of the current assessment year.	
Surviving Spouse of World War I Veteran 18,720** 3) h (6-1.1-12-16;17(b)) 4) n		1) own real and/or personal property in Indiana; 2) spouse of deceased person serving in the U.S. military before November 12, 1918; 3) honorable discharge; and 4) not claiming the Deduction for Disabled Veterans or Surviving Spouses. 5) must have owned real estate by March 1 of the current property tax year.

- Prescribed form is State Form 46021, "Sales Disclosure Form", which was revised in July, 2006.
- Form must be typed or printed in black ink.

#### Sales Disclosures

- Let's take a look at the form section by section, starting with "Property Transferred".
- "The first three lines ask for the parcel numbers. If more than three parcels are being transferred, they can be listed on a separate sheet so long as the required information is included.

# Sales Disclosures

- The parcel numbers are either printed on the tax statement or can be obtained from the county assessor's records.
- The acreage or lot size can also be obtained from either the tax statement or the county assessor's records.

Sales Disclosures	
If only a portion of the parcel is being sold, then the circle on the far right	
needs to be filled in. (For example, a person owns ten acres, but is only	
selling two acres, or someone owns three lots and is only selling one of	
them.)	
	7
Sales Disclosures	
This tells the assessor that they need to split up the parcel into pieces, and	
remove the sold acreage from the present owner and give it to the new owner.	· · · · · · · · · · · · · · · · · · ·
owild.	
•	
Sales Disclosures	
The assessor will then make a property record card for the new owner and	
change the existing card to show the sale from the present owner. This will	
also alert the county auditor to adjust their ownership records for tax	

purposes.

- The address line is for the <u>address of</u> the property being sold (street or road address, city, state and zip code).
- At the far end of the address line, it asks for the number of parcels included in the sales disclosure. This is a check to make sure that all parcels being conveyed are listed.

#### Sales Disclosures

Then the form asks for the tax billing address. The parcel address may or may not be the correct address for tax billing. This address will be used by the county treasurer to mail the tax statements, so it needs to be absolutely correct.

#### Sales Disclosures

The last line asks for the legal description. This can again come from the tax statement or the county assessor's records. It can also come from the conveyance document.

- "Next, we want to look at the "Conditions" section.
- You are asked to identify all the conditions that apply, fill in the circle and fill in any blanks, if necessary.
- If you need to identify any special conditions of uses, please do so on an additional sheet and attach to the form.

# Sales Disclosures

- 1. <u>Buyer is an adjacent property owner</u>

   he owns the land next to the subject property and is purchasing it for whatever reason.
- 2. <u>Vacant Land</u> self explanatory; the land has no structures and/or water or septic system on it

- <u>Carter of the second of the se</u>
- 4. <u>Seller Paid Points; amount if</u>
   <u>applicable</u> if there are points involved, you need to list the dollar amount.

# Sales Disclosures

fr 5. Change planned in the primary use of the property? Is vacant land going to be used for a subdivision? Is a business going to build a factory? Is an older home going to be divided into apartments? This alerts the assessor to check the property for a change in use and different assessment method.

#### Sales Disclosures

relationship between buyer and seller – the parties are relationship exists. This alerts the assessor to the fact that this may not be an arms-length transaction.

- What is an arms-length transaction?
  - a The parties are unrelated; there is no undue stimulus; the property has been exposed to the market for a reasonable amount of time; the buyer and seller are acting prudently in their own best interests.

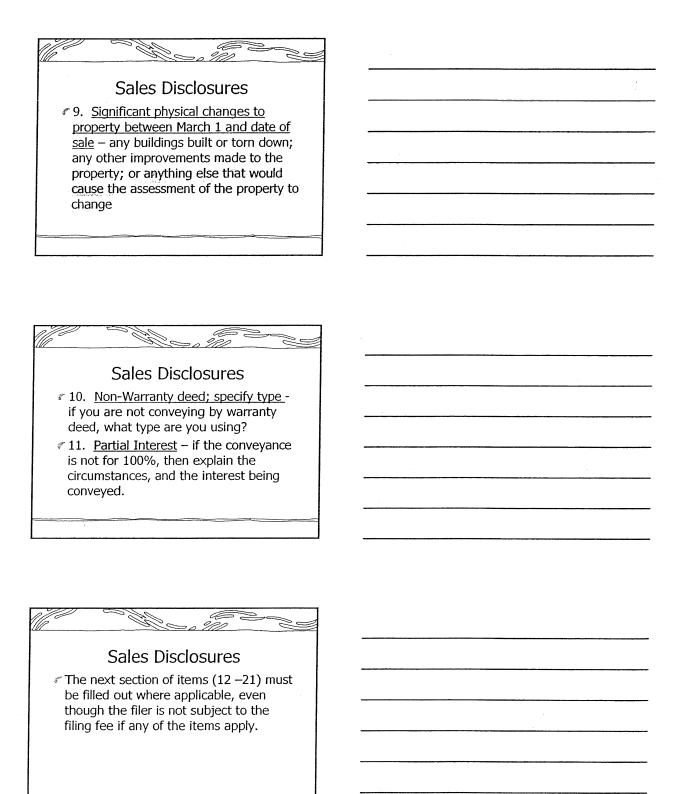

# Sales Disclosures

\*7. <u>Land Contract Dated:</u> - Selfexplanatory. If there is a land contract, enter the date of the contract.

# Sales Disclosures

\*\* 8. Personal property included in the transfer; amount if applicable – Items that are not attached (built-in or affixed) to the real estate (land and buildings (such as washers/dryers, window treatments, inventories, machinery, boats and other vehicles)

- \* 12. Security interest documents such as mortgages or trust deeds
- \* 14 Document resulting from foreclosure, or express threat of foreclosure, divorce court order, condemnation, probate or other judicial proceedings.

#### Sales Disclosures

- \$\iiint\$ 15. Agreements and other documents for mergers, consolidations and incorporations.
- 16. Quitclaim deeds not serving as a source to title

#### Sales Disclosures

- \*17. Documents involving the partition of land between tenants in common, joint tenants, or tenants by the entirety.
- 18. Transfer to a charity, not-for-profit or government institution.
- 19. Transfer for no or discounted consideration, or gift.

Do NOT Weed a

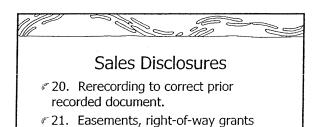

Sales Dischaus For

Death of a spouse

or life estate when

there is a surving

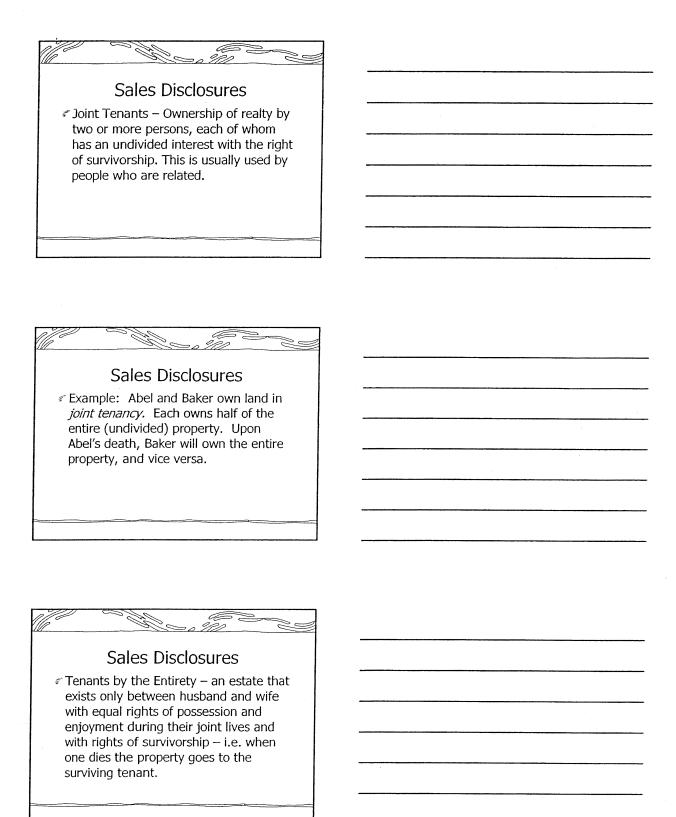

Spewse.

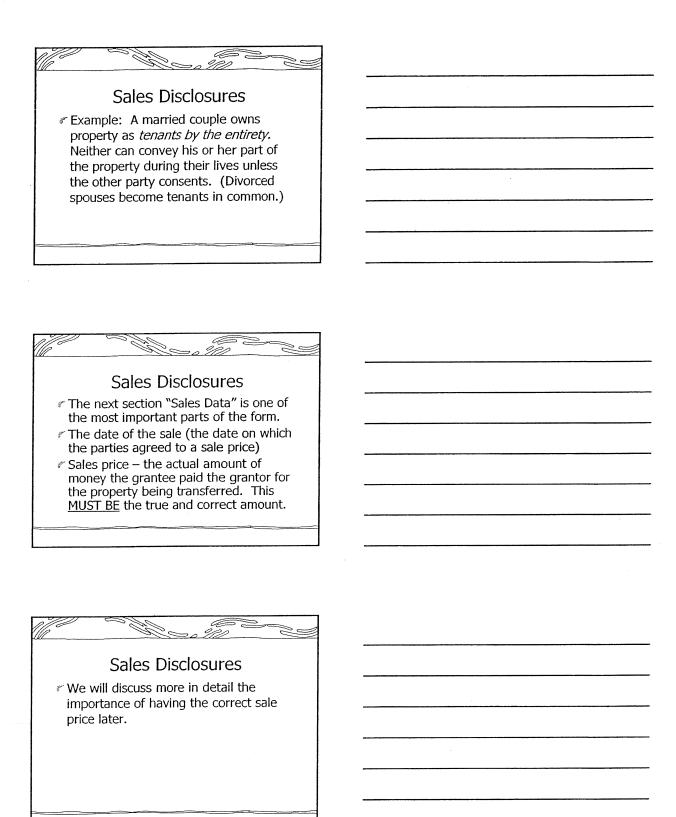

- Let's look at a few definitions:
  - Tenants in common an ownership of realty by two or more persons, each of whom has an undivided interest without the right of survivorship. Upon the death of one of the owners, the ownership share of the decedent is inherited by the party or parties named in the decedent's will.

# Sales Disclosures

Example: A syndicate is formed using a tenancy in common. Under this arrangement, all of the investors have to sign the deed for the entire property to be sold, but each tenant may convey his or her share independently.

Page two of the form asks first for the name and address of the seller(s). If there are more than two sellers, please complete the information on a separate sheet of paper and attach it to the form. It also asks for the name of the Title Company and the company's phone number.

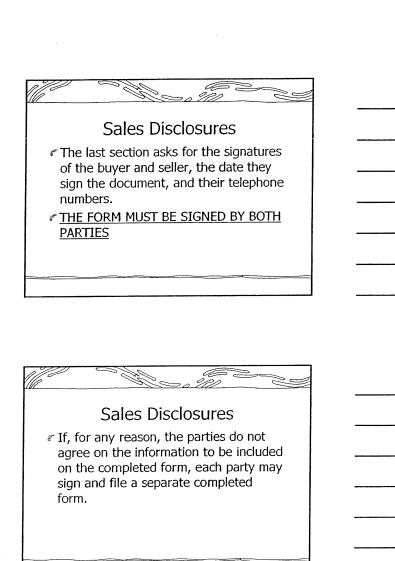

#### Sales Disclosures

- If a title company is involved, <u>please</u> provide the information.
- The next section asks for the buyer(s) name and address. Here again, if more than two individuals are involved, please complete the information on a separate sheet of paper.

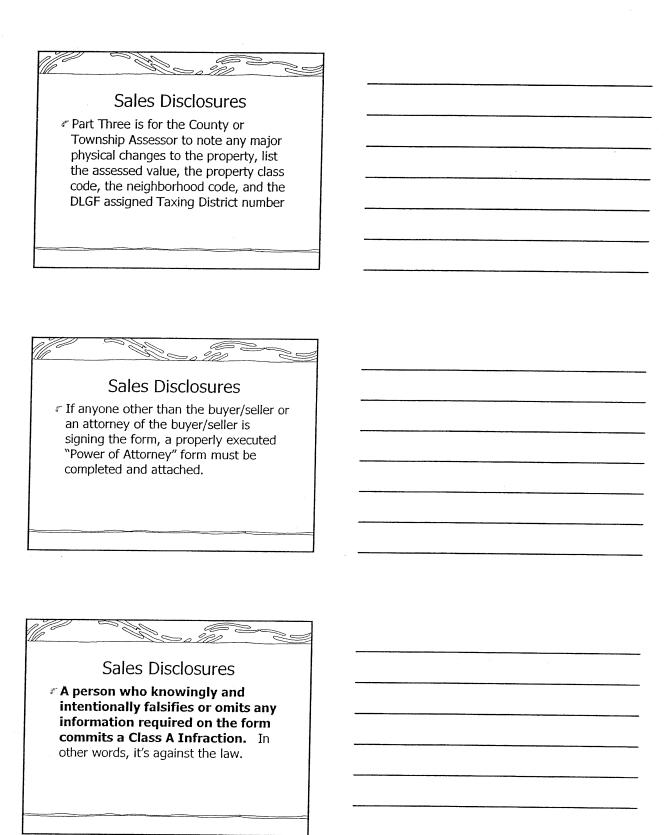

# Sales Disclosures

This section also asks if the property is going to be the buyer's primary residence. If it is, then the property will be eligible for the homestead credit and standard deduction if the buyer files for them with the county auditor.

# Sales Disclosures Part Two of the form is for the County Auditor to file stamp the form, indicate that it is complete, and enter the date the property was transferred in the Transfer Book.

- The county auditor is responsible for collecting the filing fee.
- The county auditor is also responsible for ensuring that all parties to the conveyance have completed and signed the sales disclosure form as required.

The county auditor may not accept the sales disclosure statement if the statement is not signed by the buyer and seller. (In the case of multiple sellers and/or buyers, only one seller and one buyer are required to sign.)

#### Sales Disclosures

- If the buyer or seller fails to completely fill out their designated portion of the form, the county auditor may not accept the conveyance document.
- An incomplete sales disclosure, along with the conveyance document should be returned to the person attempting to file the form.

By law (IC 6-1.1-5.5-6) the county recorder "shall not record a conveyance document without evidence that the parties have filed a completed sales disclosure form with the county auditor."

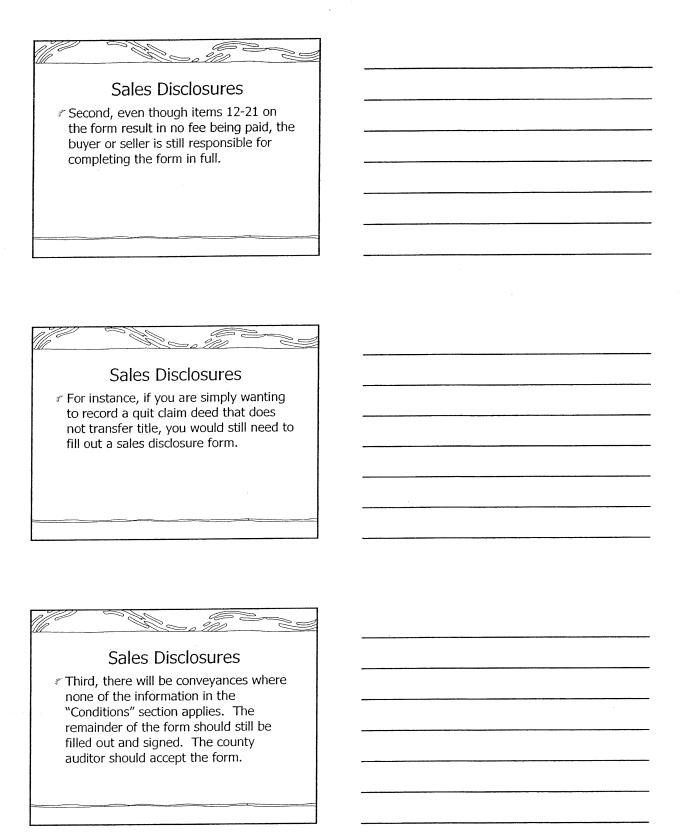

#### Sales Disclosures

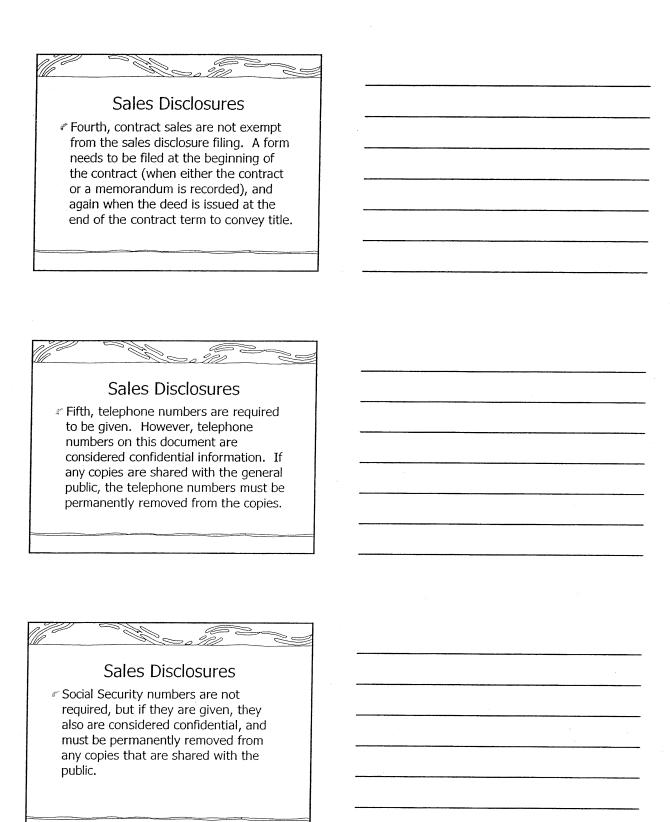

- Any questions at this point on the form itself?
- Let's look at some other points about sales disclosures and how they are used.

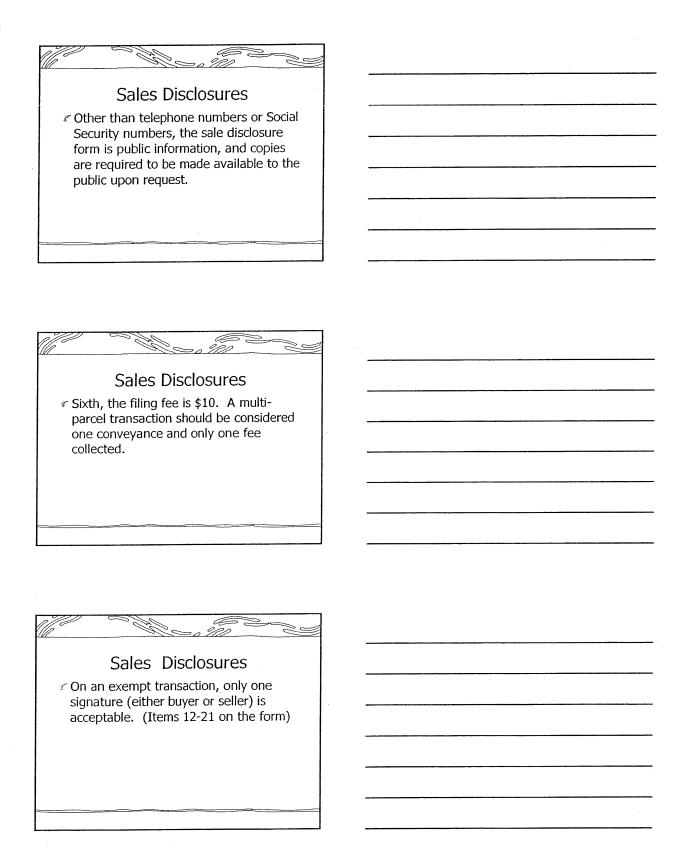

# Sales Disclosures

First, the form is required by law. Indiana Code 6-1.1-5.5 requires, that before a conveyance document can be filed with the county auditor, a sales disclosure form must be filed.

- Misdemeanors and infractions:
  - \* A person who knowingly and intentionally:
    - Falsifies the value of transferred real property;
    - $\ensuremath{\epsilon}$  Omits or falsifies any information required to be provided in the sales disclosure form;

commits a Class A misdemeanor.

# Sales Disclosures

- A public official who knowingly and intentionally accepts:
  - A sales disclosure document for filing that:
  - Falsifies the value of transferred real property;
     or
    - Omits or falsifies any information required to be provided in the sales disclosure form; or

# Sales Disclosures

A conveyance document for recording in violation of IC 6-1.1-5.5-6 commits a Class A infraction.

(This section pertains to the county auditor and the county recorder.)

"Indiana Code 6-1.1-5.5-2 defines
"conveyance document" as "any
document, deed, contract of sale,
agreement, judgment, lease that
includes the fee simple estate and is for
a period in excess of ninety (90) years,

#### Sales Disclosures

quitclaim deed serving as a source of title, or other document presented for recording, that purports to transfer a real property interest for valuable consideration."

#### Sales Disclosures

- It does not include:
  - Security interest documents, such as mortgages and trust deeds
  - Leases for a term less than 90 years
  - Documents for compulsory transactions as a result of foreclosure or express threat of foreclosure, divorce, court order, condemnation or probate.

- Documents involving the partition of land between tenants in common, joint tenants, or tenants by the entirety.
- Agreements or other documents for mergers, consolidations, and incorporations involving solely nonlisted stock.
- Quitclaim deeds not serving as a source of title

#### Sales Disclosures

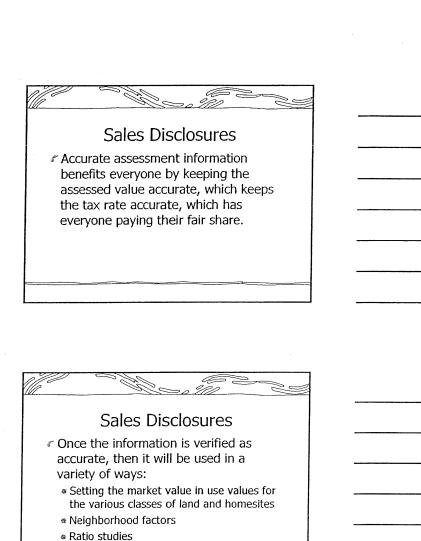

- - \*The county assessor or other assessing official <u>must</u> verify the accuracy of the information on the form. This can be done in several different ways calls to the seller, calls to the buyer, calls to the title company, a survey form whatever method the assessor finds that works.

#### Sales Disclosures

If the county or township assessor calls you to verify the information on the form, they are only doing their job.

Prior to the 2002 reassessment, the township assessors used the sales disclosure forms to set the rates for residential land, commercial land, industrial land and agricultural homesites.

**★** Annual adjustments

Also, prior to the 2002 reassessment, the township assessor had to break the township down into neighborhoods. These neighborhoods were defined by such things as common development characteristics, size of lots, average age of the majority of improvements, geographic boundaries and sales.

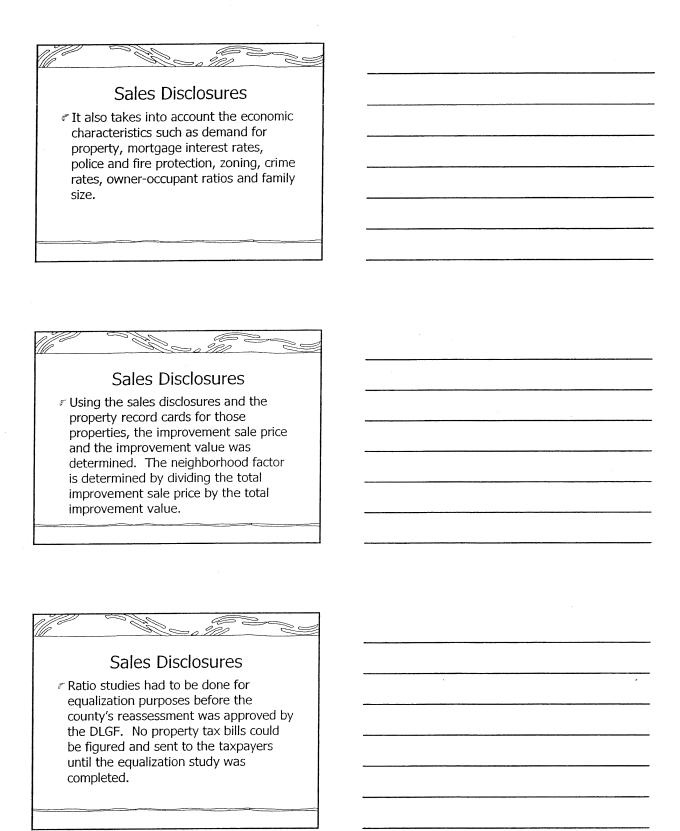

#### Sales Disclosures

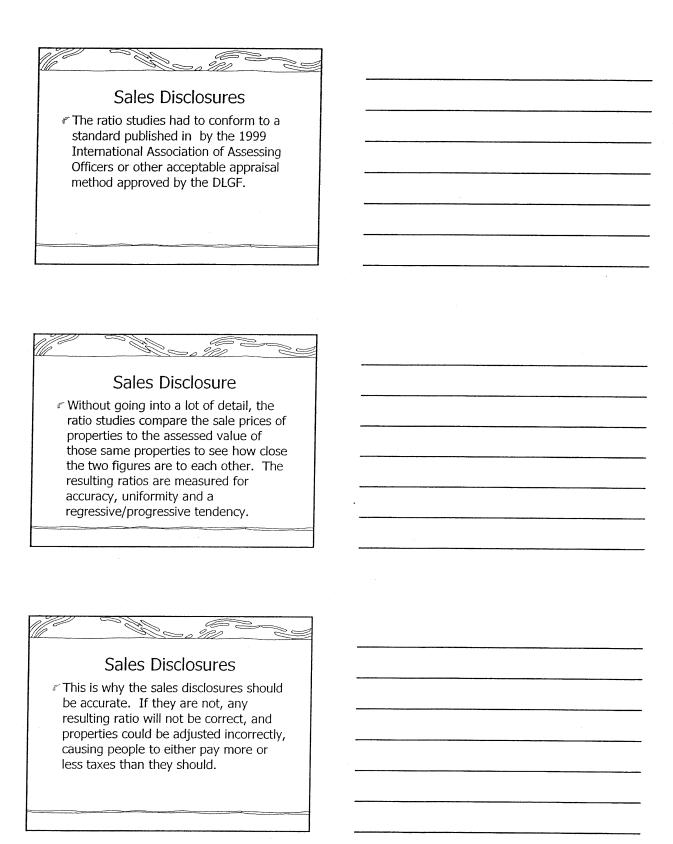

TOnce the boundaries were established, then the township assessor used the sales disclosures to calculate the land base rates applicable to each neighborhood.

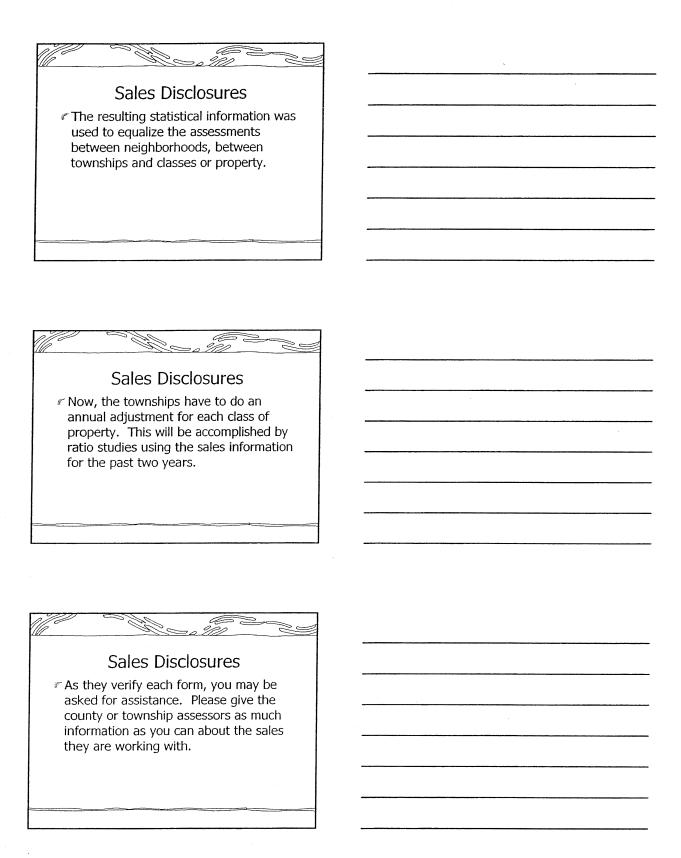

#### Sales Disclosures

Post 2002, the township assessors also use the sales disclosures to calculate a neighborhood factor. This percentage accounts for the impact on value caused by physical characteristics in the neighborhood such as the type and layout of streets, availability of support services, and utilities.

▼ It is very important that the information be accurate. These studies must fall within certain guidelines, and will show areas where property value has gone up or down or stayed relatively the same. Assessment will be adjusted according to the information in the studies.

#### Sales Disclosures Fach county has a sales disclosure fund, and the county auditor routinely deposits the fees collected into this fund. Under present law, fifty (50%) of what the county collects stays in the county.

- Money in the fund can only be used for:
  - Administration of the sales disclosure process;
  - Verification of the information contained on the form;
  - Training of assessing officials;
  - Purchasing computer software or hardware for a property record system.

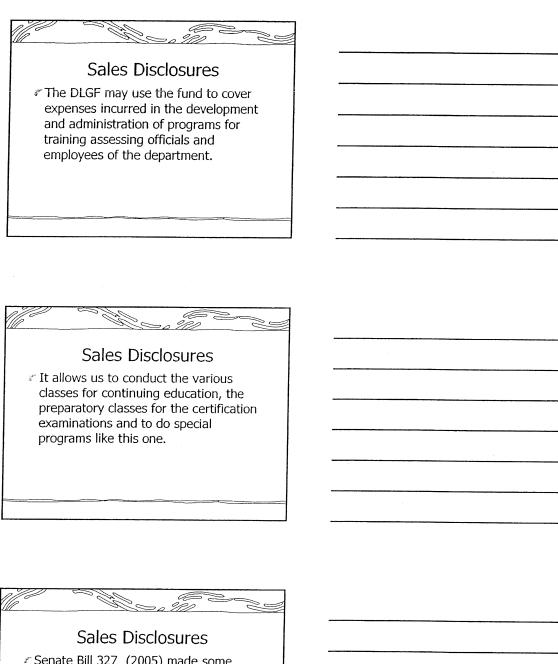

#### Sales Disclosures

The county council must appropriate the money from the fund based upon requests of the assessing officials in the county.

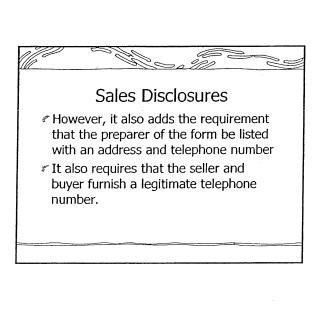

# Sales Disclosures

The other 50% of the money goes to the state. There is a state assessment training fund, which is a dedicated fund. This means it cannot be used for anything other than the stated purpose for which it was created.

F Senate Bill 327 (2005) made some changes in the property reassessment fund, including adding the verification of sales disclosure forms as an authorized expense of the fund. It also calls for the \$10 filing fee to be extended through the end of 2009, and delays the start of the next reassessment.

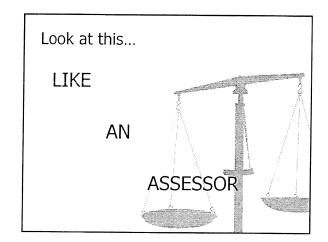

Now that we have discussed the forms and what needs to be on them, there are several exercises that we are going to work.

"You have several forms in front of you. Take a few minutes to look them over and then tell me if they are deficient in any way.

# Presented by: Ad Valorem Solutions

#### Residential Properties Effective Age

- > Chronological Age
- > Effective Age

#### **Chronological Age**

The actual, sometimes called historical, age is the number of years that have elapsed since the building construction was completed up to the depreciation date, which is March 1, 1999.

> The chronological age of a structure has traditionally been used as a strong indicator of its depreciation. But this approach, while simple and easy to use, does not generally reflect the actions of the market in buying and selling decisions, or the actual loss in value suffered by the improvements.

#### **Effective Age**

The age of a structure as compared to other structures performing like functions. Sometimes it can also be thought of as the actual age less the years that have been removed from the actual age by such things as maintenance, repair, upgrading, and change.

Effective age can also be decreased by the removal of some kind of functional inadequacy or the modernization of one or more of the systems.

- > The items that would tend to reduce the effective age might include:
  - · New paint
  - Carpeting
  - Roof
  - Furnace
  - · Electrical System
  - Windows
  - Plumbing
  - Room additions
  - · General home remodeling

> For the valuation of real property within the State of Indiana, the **condition rating** will reflect the effective age of the structures.

> By changing, maintaining, or modernizing the structure, the age of the structure is effectively lowered, thereby the total economic life is extended. This change in economic life is reflected in the condition rating assigned the structure.

Effective age may also be changed in a residential structure when remodeling takes place and the structure is updated, renovated, or when additional area is added which increases the structures functional utility.

# Residential Examples

- > In class problems
  - · Chronological age
  - · Effective age
  - · Weighted age

# Commercial Properties Effective Age

The actual age of a structure should be determined from the records of the owner. If this is not available, public records such as building permits or older property record cards may be used. ➤ Structures which have had additions built subsequent to the construction of the principal or original structure must have a "weighted" age calculated to use in place of the actual age when using the commercial and industrial depreciation tables.

> The method of calculating weighted age is one of weighting the actual age of the original structure and each of its additions by the square footage contained in each part of the structure.

#### Example

An industrial plant was originally built forty (40) years ago in 1959 and has had two additions; one twenty (20) years ago in 1979 and the second five (5) years ago in 1994. The original structure contained twenty thousand (20,000) square feet, addition one contained five thousand (5,000) square feet and addition two contained ten thousand (10,000) square feet.

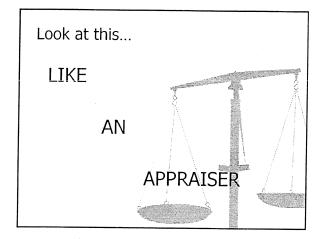

The calculation of the weighted age would be as follows:

Part of Structure Original plant	<u>Size</u> 20,000	Total S.F. ÷35,000	<u>%</u> 57.14	<u>Year</u> 1959	Contribution =1,119.43
1st addition	5,000	+35,000	=14.29	x1979	=282.71
2nd addition	10,000	÷35,000	=28.57	x1994	=569.71
Totals	35,000		100		=1,971.85

1,971.85 rounds to the year **1972**. Therefore, the structure has a weighted age of twenty-seven (27) years and the assessor would enter 1972 on the property record card in the age column under summary of improvements.

#### Commercial Examples

- > In class problems
  - Actual Age
  - · Weighted Age
  - · Effective Age

#### Effective age

➤ The age of property that is based on the amount of observed deterioration and obsolescence it has sustained, which may be different from its chronological age. (USPAP, 2002 ed.)

{The dictionary of Real Estate Appraisal 4th Edition}

- Actual age, which is sometimes called historical age or chronological age, is the number of years that have elapsed since building construction was completed.
- Effective age is the age indicated by the condition and utility of a structure and is based on an appraiser's judgment and interpretation of market perceptions.

{The Appraisal of Real Estate 12th Edition}

- Actual Age Is the difference between the date of construction and the effective date of the appraisal.
- Effective Age Is the numerical age estimate of the improvements based on the conditions of the improved property and comparison with competitive properties of the same actual age.

{The Appraisal of Real Estate 12th Edition (workbook)}

Age and Life Relationships

#### Description of Improvements

- > Age vs. Effective Age:
  - Most abused section of the appraisal report
  - Large unsupported differences between age and effective age will result in an inflated value.

# Supporting Effective Age

- > The wider the variance, the more details needed for support.
- Specifics should be provided for updates, remodeling, etc., that would increase the subject's value based on local market acceptance

#### Age/Life Method

- This method estimates depreciation as a lump sum based on assumed straight-line depreciation
- Economic life is estimated using rules of thumb based on past experience or published sources
- Effective age is usually used in place of actual age, but this varies

#### Age/Life Method Example

Reproduction cost nev	V	\$255,000
Total economic life	55 years	
Effective age	20 years	
% accrued depreciat	ion ·	= 20/55 = 36.4%
Accrued depreciation	92,820	
Depreciated value of it	162,180	
Land value	_39,000	
Estimated market valu	е	\$201,180

# Modified Age/Life Method

- Sometimes the age/life method is modified by subtracting out curable physical and functional depreciation before calculating the lump sum depreciation of the rest
  - The idea is that the owner will cure these problems because it adds more value than it costs

# Modified Age/Life Method Example

\$255,000

Reproduction cost new

Physical and functions	12,500					
Adjusted cost		\$242,500				
Total economic life	55 years					
Effective age	17 years					
% accrued depreciat	= 17/55 = 30.9%					
Accrued depreciation		74,933				
Depreciated value of in		167,567				
Land value		_39,000				
Estimated market valu		\$206,567				

# Comments on Age/Life Method

- > The general relationship between age and depreciation varies from market to market
  - · Use local patterns, not national ones
- > Although this method assumes straight line depreciation, this is not typically accurate
  - The amount of depreciation changes from year to year
- Location of a property within a given market area does not appear to affect depreciation rates

# Comments on Age/Life Method

- Effective age (based on subjective appraiser judgment) appears to be more accurate than physical age
- Depreciation rates of between 0.90 and 1.70 percent per year seems to be a useful benchmark for properties that are not too old
- Depreciation rates can be estimated from comparable sales (market extraction)

# Appraising Examples

- > In class problems
  - · Effective Age
  - · Age Life Method
  - · Overall review

#### 2007 JOINT WINTER CONFERENCE COURSE DESCRIPTIONS

#### TRENDING "A WHOLE LOT MORE THAN JUST NEW FACTORS"- 3 HOURS

This course covers all the preliminary work need to properly trend all types of property prior to calculating the basic residential market factors and submitting a ratio study. We will review neighborhood arrangements, sales disclosure investigation, outlier resolution, land value determination, Commercial/Industrial trending techniques, as well as residential assessments in a market system.

Bring: Pencil and calculator

#### COMPOUND INTEREST TABLES MADE SIMPLE - 3 HOURS

The compound interest tables aren't just for math geeks! These tables are valuable tools when used in the hands of a trained appraiser. This course will review the art of saving to replace the roof on a business, determine the leaseback of property and it's application to market value, calculate discounted values for developmental ground or proposed large tenant projects. Yes, all this and more awaits you in this fun and educational class. Be the first in your county to become a professional compound interest table operator. Don't be shy, Pat Alesandrini will make this very easy to understand!

Bring: Pencil and calculator

# <u>INHERITANCE TAX: FROM BEGINNING TO END AND ALL THE IN BETWEEN-3 HOURS</u>

This course is designed to educate current assessors and their staff along with those newly elected assessors. You will learn what forms to use and when. Auditing the IH-6, what you should look for and why it's important. We will also talk about dealing with difficult attorneys and personal representatives, and how you can get them to comply with your requests. Additionally, we will discuss so those "odd situations" that pop up just when you think you've heard it all!

Bring: No materials required

#### **OFFICE MANAGEMENT-3 HOURS**

This course will cover many different aspects of management in the assessment office. Topics to be covered include: functions of the assessment office-both short and long term; organizational structure; time and staff estimations for reassessment projects; public relations; and quality control. This course will assist the assessment official to streamline their operating procedures. This class will be beneficial to all regardless of your level of employment.

Bring: Pencil and calculator

#### INVESTMENT DEDUCTIONS AND ABATEMENTS - 3 HOURS

A year later and what have we learned? This course will provide a basic overview of tax abatements, including a review of the abatement process, the Investment Deduction, and the Assessor's role. Frequently asked questions (or problems) about abatements and the investment deduction will also be discussed, as well as the Minimum Value Ratio (MVR).

#### **COURSE DESCRIPTIONS**

#### GIS & Assessing "How they go hand in hand"

THIS COURSE WILL INTRODUCE THE ASSESSOR TO THE BENEFITS OF USING GIS FOR THE DAY TO DAY OPERATIONS OF THE ASSESSOR'S OFFICE. ASSESSOR'S OFFICES ARE REQUIRED TO DO MORE WITH LESS EVERY YEAR. GIS GIVES ASSESSORS A TOOL TO MAXIMIZE THEIR RESOURCES. WE WILL GIVE ASSESSORS A FIRST HAND ACCOUNT OF THE DOS AND DON'TS OF IMPLEMENTING A GIS SYSTEM. GIS IS ALWAYS A WORK IN PROGRESS, DEMANDING OF ITS USER'S TOTAL COMMITMENT. USED AND MAINTAINED CORRECTLY GIS WILL GIVE A COUNTY A PRODUCT THAT WILL MAKE IT MORE EFFICIENT AND ACCOUNTABLE. NO CREDIT HOURS/INFORMATIONAL CLASS ONLY INSTRUCTORS: JUDY SHARP & PHILIP BERNARD

# TRENDING PROBLEMATIC NEIGHBORHOODS "A WHOLE LOT MORE THAN JUST NEW FACTORS"

THIS CLASS WILL CONCENTRATE ON PROBLEMATIC NEIGHBORHOODS AND HOW JUST CALCULATING NEW FACTORS WON'T GIVE YOU UNIFORM AND EQUITABLE ASSESSMENTS THROUGHOUT THE ENTIRE NEIGHBORHOOD, DESPITE BEING WITHIN STATE STANDARDS. THIS CLASS WILL FOCUS ON AN APPROACH THAT PROVIDES BETTER UNIFORMITY, REDUCED APPEALS AND DECREASED TAX RATES BY ADDRESSING EFFECTIVE YEAR, CONDITION AND GRADE FOR ALL PROPERTIES WITHIN THE NEIGHBORHOOD AS THEY RELATE TO 2006 MARKET VALUES. 3 CREDIT HOURS BRING A CALCULATOR INSTRUCTOR: KEN SURFACE

#### OFFICE MANAGEMENT FOR DUMMIES

THIS CLASS WILL BE HEADED BY A PANEL OF VOLUNTEER ASSESSING OFFICIALS. IT IS DESIGNED TO HELP NEWLY ELECTED OFFICIALS AND THEIR DEPUTIES TO ORGANIZE AND UNDERSTAND THE DAILY OPERATIONS OF THE OFFICE. PLEASE BRING ANY QUESTIONS OR IDEAS WITH YOU OR E-MAIL THEM IN ADVANCE TO CMAYNARD@HANCOCKCOINGOV.ORG PRIOR TO CONFERENCE. HOPEFULLY, EVERYONE CAN LEARN THROUGH THIS INFORMAL ROUND TABLE DISCUSSION.

NO CREDIT HOURS/INFORMATIONAL CLASS ONLY MODERATOR: CAROLE MAYNARD

#### INHERITANCE TAX

THIS CLASS IS DESIGNED TO EDUCATE ASSESSORS AND THEIR STAFF ON INHERITANCE TAX PROCEDURES AT THE COUNTY LEVEL. TOPICS TO BE COVERED INCLUDE: AUDITING THE IH-6, IH-14 PROCEDURES, OVERVIEW OF FORMS AND HOW TO DEAL WITH BANKS, ATTORNEYS AND TAXPAYERS.

3 CREDIT HOURS

INSTRUCTOR: KRISTEN KEMP

#### **PTABOA**

1.5 CREDIT HOURS

INSTRUCTOR: MARILYN MEIGHEN
